Algorithms of Armageddon George Galdorisi, Sam J Tangredi, 2024-03-12 It is unclear if U S policy makers and military leaders fully realize that we have already been thrust into an artificial intelligence AI race with authoritarian powers Today the United States peer adversaries China and Russia have made clear their intentions to make major investments in AI and insert this technology into their military systems sensors and weapons Their goal is to gain an asymmetric advantage over the U S military The implications for our national security are many and complex Algorithms of Armageddon examines this most pressing security issue in a clear insightful delivery by two experts Authors George Galdorisi and Sam J Tangredi are national security professionals who deal with AI on a day to

day basis in their work in both the technical and policy arenas Opening chapters explain the fundamentals of what constitutes big data machine learning and artificial intelligence They investigate the convergence of AI with other technologies and how these systems will interact with humans Critical to the issue is the manner by which AI is being developed and utilized by Russia and China The central chapters of the work address the weaponizing of AI through interaction with other technologies man machine teaming and autonomous weapons systems The authors cover in depth debates surrounding the AI genie out of the bottle controversy AI arms races and the resulting impact on policy and the laws of war Given that global powers are leading large scale development of AI it is likely that use of this technology will be global in extent Will AI enabled military weapons systems lead to full scale global war Can such a conflict be avoided The later chapters of the work explore these questions point to the possibility of humans failing to control military AI applications and conclude that the dangers for the United States are real Neither a protest against AI nor a speculative work on how AI could replace humans Algorithms of Armageddon provides a time critical understanding of why AI is being implemented through state weaponization the realities for the global power balance and more importantly U S national security Galdorisi and Tangredi propose a national dialogue that focuses on the need for U S military to have access to the latest AI enabled technology in order to provide security and prosperity to the American people

The Generativity Advantage Mohammad Keyhani, 2025-08-04 How can businesses systematically profit from innovations they never predicted created by people they ve never met solving problems they didn t even know existed While many businesses celebrate user innovation few take their user innovators seriously enough as entrepreneurs The Generativity Advantage brings powerful ideas from technology generativity theory into the domains of business strategy and entrepreneurship It explores ways to specifically design products to spur user innovation product generativity and to build dynamic markets for those innovations market generativity in order to achieve a strategic generativity advantage the ability to systematically profit from the unpredicted innovations of others on a massive scale Through numerous case studies from Apple and Google to emerging leaders in generative AI and no code technology like OpenAI Anthropic Bubble Notion Coda and Webflow it shows how product generativity and market generativity can together create a powerful flywheel effect and sustained competitive advantage Yet the book also demonstrates that achieving a generativity advantage is neither easy nor trivial the world s leading companies struggle to implement these ideas effectively The book s key lesson is to help your user innovators succeed as serious entrepreneurs and you will benefit generously in turn Whether you re building a digital platform a marketplace or any product that allows users to innovate this book provides the conceptual tools and practical strategies needed to transform your platform into an engine of continuous innovation Learn how to move beyond celebrating user creativity to systematically enabling and profiting from user entrepreneurship creating value at scales previously unimaginable

PC AI. ,2001 Sustainable Cities Claudio Scardovi, 2021-03-27 Global cities are facing an almost unprecedented challenge of change As they re emerge from the Covid

19 pandemic and get ready to face climate change and other potentially existential threats they need to look for new ways to support wealth and wellbeing creation leveraging Big Data and AI and suing them into their physical reality and to become greener more inclusive and resilient hence sustainable This book describes how new digital technologies could be used to design digital and physical twins of cities that are able to feed into each other to optimize their working and ability to create new wealth and wellbeing The book also describes how to increase cities social and economic resilience during crisis time and addressing their almost fatal weaknesses as it became all too obvious during the recent COVID 19 crisis Also the book presents a framework for a critical discussion of the concept of smart city suggesting its development into a cyber and meta one meaning not only digital systems can allow physical ones e g cities citizens households and companies to become smarter but also the vice versa is true as off line data and real life behaviours can support the optimization and development of virtual brains as a sum of big data and artificial intelligence apps all sitting over the cloud An analysis of the fundamental dynamics of this emerging info telligence economy and of the potential role of big digital players like Amazon Google and Facebook is then paving the way to discuss a few strategic forays on how traditional sectors such as financial services real estate TMT or health could also evolve leveraging Big Data and AI in a cyber physical integrated setting Finally a number of thought provoking use cases that could be designed around individuals and to improve the success and the resilience of households and companies living and working in urban areas are discussed as an example of one of the most exciting future markets to come the one of global sustainable cities
