**Challenging the Notion of Crisis in Education** Michael Thomas Smith, 2026-01-27 This book explores the narrative of education being in a state of perpetual crisis and the motivations behind the historical and contemporary tendency to exploit the same. Written as a call for greater media literacy, the book recognizes how and when solutions to the oft-acknowledged educational crises fail to address root causes which ends up only maintaining the status quo. The chapters of the book examine how the notion of education being in a perpetual state of crisis is often underpinned by a lack of funding, cherry-picking of data, ideological imperatives, the fashioning of public opinion as amorphous or simple incompetence. Offering real-world solutions using international examples from Japan, India, Sweden, Russia, South Korea, and more, explained through robust philosophical conceptions, the author advocates for skepticism and epistemic humility as a key component in education. The book ultimately calls for people to reclaim the agency they have collectively surrendered in face of these crises and emphasizes on forging a new path that prioritizes forward thinking movements. This book will be of value to academics, postgraduates, and scholars of education interested in a solution-centric reorientation of the ongoing narrative and notions of education.

*The Nature of Business Transformation* Richard Kelly, 2022-03-17 This book is a practical guide for business professionals to develop and improve business intelligence and collective decision-making within their organisation. It proposes a progressive reconfiguration of the traditional business operating system using a nature-inspired framework called swarm facilitation that enables and facilitates collective decision-making. Organisations have followed the same rigid formula of problem-solving and decision-making for over 100 years. It is dominated by centralised governance and pyramid decision-making. Such an approach is no longer fit for purpose in an environment of employee disengagement, artificial intelligence, AI, superintelligence, and Covid-19 fallout. By the end of this book, readers will be able to solve organisational problems and challenges collectively using swarm intelligence, upgrade and future-proof business operating systems to reflect a more collective decision-making approach fit for the new connected economy, and Industry 4.0 embrace mindset quotients that support people working in a more networked, self-organising, and collective environment. The book is important reading for leaders and managers who are focused on building organisational capital and engagement and gaining value from the emerging technology by evolving their business operating system into a digital ecosystem as part of an ongoing digital transformation strategy. It will also appeal to experts working in the field of organisational change and development both within the organisation and as consultants.
