Building Trust in the Generative Artificial Intelligence

Era Joanna Paliszkiewicz, Jerzy Gołuchowski, Magdalena Mądra-Sawicka, Kuanchin Chen, 2025-06-27. In an era where generative artificial intelligence (AI) is reshaping industries and daily life, trust has become a cornerstone for its successful adoption and application. *Building Trust in the Generative Artificial Intelligence Era: Technology Challenges and Innovations* explores how trust can be built, maintained, and evaluated in a world increasingly reliant on AI technologies. Designed to be accessible to a broad audience, this book blends theoretical insights with practical approaches, offering readers a comprehensive understanding of the topic. The book is divided into three parts. The first part examines the foundations of trust in generative AI, highlighting trends and ethical challenges such as greenwashing and remote work dynamics. The second part provides actionable frameworks and tools for assessing and enhancing trust, focusing on topics like cybersecurity, transparency, and explainability. The final section presents global case studies exploring university students' perceptions of ChatGPT, generative AI's applications in European agriculture, and its transformative impact on financial systems. By addressing both the opportunities and risks of generative AI, this book delivers groundbreaking insights for academics, professionals, and policymakers worldwide. It emphasizes practical solutions, ensuring readers gain the knowledge needed to navigate the evolving technological landscape and foster trust in transformative AI systems.

Artificial Intelligence and Work

John Bratton, Laura Steele, 2024-12-04. In an era marked by insecurity from neoliberalism, financial volatility, political instability, regional conflicts, pandemics, and the climate crisis, Artificial Intelligence (AI) is revolutionizing our work organizations, societies, and the environment. This critical text explores who truly benefits from AI's development and deployment, offering a comprehensive overview of AI's nature, history, and applications. It delves into crucial themes such as the future of work, digitalization, neoliberalism's impact, power dynamics, ethics, inequality, gender, race, intersectional discrimination, and environmental sustainability. Unlike practical machine learning guides, this book examines how AI and AI-based technologies are transforming work, highlighting both benefits and potential harms. Combining critical management

and leadership studies with organizational sociology it addresses societal implications inequality ethics and power often overlooked by other textbooks John Bratton's lucid and engaging writing style brings a cutting edge subject to life blending breadth critical analysis and academic rigor Contemporary examples illustrate AI's real life implications for organizations and work today while thought provoking questions encourage readers to engage with and reflect on the topics throughout Authored by John Bratton an Honorary Professor at Queen's University Belfast and Laura Steele a Senior Lecturer in Business and Society at Queen's University Belfast this interdisciplinary text is essential for students studying contemporary and emerging issues in business and management including AI business analytics digitalization and the future of work It is also recommended for courses on the sociology of work ethics organization studies management leadership and HRM This book is poised to become an essential textbook for courses on AI digitalization and the future of work making it a valuable resource for students and educators alike
