The Daydream George H. Green, 1923 *The Red Horizon* Evangeline Ryves, 1913 **The Day-dreamer** Jesse Lynch Williams, 1906 *The Living Age* ,1926 **The Oxford Handbook of Spontaneous Thought** Kieran C. R. Fox, Kalina Christoff, 2018

Where do spontaneous thoughts come from It may be surprising that the seemingly straightforward answers from the mind or from the brain are in fact an incredibly recent understanding of the origins of spontaneous thought For nearly all of human history our thoughts especially the most sudden insightful and important were almost universally ascribed to divine or other external sources Only in the past few centuries have we truly taken responsibility for their own mental content and finally localized thought to the central nervous system laying the foundations for a protoscience of spontaneous thought But enormous questions still loom what exactly is spontaneous thought Why does our brain engage in spontaneous forms of thinking and when is this most likely to occur And perhaps the question most interesting and accessible from a scientific perspective how does the brain generate and evaluate its own spontaneous creations Spontaneous thought includes our daytime fantasies and mind wandering the flashes of insight and inspiration familiar to the artist scientist and inventor and the nighttime visions we call dreams This Handbook brings together views from neuroscience psychology philosophy phenomenology history education contemplative traditions and clinical practice to begin to address the ubiquitous but poorly understood mental phenomena that we collectively call spontaneous thought In studying such an abstruse and seemingly impractical subject we should remember that our capacity for spontaneity originality and creativity defines us as a species and as individuals Spontaneous forms of thought enable us to transcend not only the here and now of perceptual experience but also the bonds of our deliberately controlled and goal directed cognition they allow the space for us to be other than who we are and for our minds to think beyond the limitations of our current viewpoints and beliefs *Imprint* ,1964 **The Leadership Shadow** Erik de Haan, Anthony Kasozi, 2014-08-03

In today s fast paced interconnected and mercilessly competitive business world senior executives have to push themselves and others hard Paradoxically to succeed as leaders they also need to relate to others very well Under stress and challenge the qualities executives have relied on to get them to the top and to achieve outstanding results can overshoot into unhelpful drives that lead to business and personal catastrophes The Leadership Shadow draws on the lived experience of executives to make sense of what actually happens when their drivers overshoot and they act out the dark side of leadership It shows how executives can find stability in the face of uncertainty resilience in the face of gruelling demand and psychological equilibrium as a leader in the face of turbulence *The Fiction of Ian McEwan* M. Hutton, 2005-09-19

Ian McEwan is one of Britain s most established and controversial writers This book introduces students to a range of critical approaches to McEwan s fiction Criticism is drawn from selections in academic essays and articles and reviews in newspapers journals magazines and websites with editorial comment providing context drawing attention to key points and identifying differences in critical perspectives The book
