Canton,1991 A time saving guide for solving all kinds of programming problems this book picks up where other programming codebooks leave off assuming programmers know the basics and providing help with more complex programming problems Each subject in the book is treated in detail with numerous code samples that can be interfaced with all high level languages **CICS Application Design** Bob Crownhart,1995 The only CICS book that covers all IBM platforms including the newly announced CICS 6000 and CICS for OS 400 Crownhart explains how to exploit CICS facilities make informed and effective choices when designing real world applications and utilize client server functionality within a CICS application He also covers distributed and cooperative processing **AS/400--concepts and Facilities** Tony Baritz,David Dunne,1993 A complete update of the authoritative guide to AS 400 programming networking and hardware This thorough revision features eight entirely new chapters covering the latest developments in operations IBM and third party tools PC and mainframe connectivity performance tuning and more In addition all of the chapters have been carefully updated to reflect new software

developments in RPG and CODE 400 MVS I/O Subsystems Gilbert E. Houtekamer, H. Pat Artis, 1993 Guidelines for making performance and cost trade offs in MVS I O subsystem designs Readers will find explanations of design alternatives measurement techniques for identifying problems in existing configurations and modeling techniques that can be used to analyze the strengths and weaknesses of possible alternatives AS/400 Application Development Using COBOL/400 Gerald S. Kaplan, 1996 This is the most comprehensive guide to developing simple to complex applications on IBM s AS 400 mid range computer using COBOL 400 CLIST Programming Kurt Bosler, 1990 The REXX Handbook Gabriel Goldberg, Philip H. Mitra Gopaul, 1994 The essential one stop reference for all IBM mainframe application developers and programmers This easy to use guide collects all the information a programmer needs on IBM mainframe software products programmers utilities and computer languages and organizes it for fast information retrieval Covers virtually all functions commands and syntax of the most widely used software and languages **NetView** Larry D. Trindell, 1993 This comprehensive reference details the nature capabilities and use of IBM s NetView network management program in the SNA environment Presenting highly technical topics in layman s language it describes all major features of NetView and details the physical and data communications components of SNA CICS Ted C. Keller, 1993 Destined to become the standard reference for CICS performance planning this comprehensive guide details the factors that drive CICS performance and helps readers develop comprehensive performance plans It provides a single point of reference for designing and planning CICS performance through integration of software engineering queueing theory and workload capacity principles IBM's Workstation CICS Bob Crownhart, 1992 First book for workstation CICS application developers using PC DOS or OS 2 to develop on line applications for MVS VM and DOS VSE systems It covers installation customization communication and operation of the Workstation CICS product from the application systems programmer and workstation specialist s points of view **IBM Mainframes** Nallur S. Massive investments of time and resources are made in developing and implementing these systems Maintenance is inevitable It is hard and costly Considerable resources are required to keep the systems active and dependable We cannot maintain software unless maintainability characters are built into the products and processes There is an urgent need to reinforce software development practices based on quality and reliability principles Though maintenance is a mini development lifecycle it has its own problems Maintenance issues need corresponding tools and techniques to address them Software professionals are key players in maintenance While development is an art and science maintenance is a craft We need to develop maintenance personnel to master this craft Technology impact is very high in systems world today We can no longer conduct business in the way we did before That calls for reengineering systems and software Even reengineered software needs maintenance soon after its implementation We have to take business knowledge procedures and data into the newly reengineered world Software maintenance people can play an important role in this migration process Software technology is moving into global and distributed networking environments Client server systems and object orientation are on their way Massively parallel processing systems and networking resources are changing database services into corporate data warehouses Software engineering environments rapid application development tools are changing the way we used to develop and maintain software Software maintenance is moving from code maintenance to design maintenance even onto specification maintenance Modifications today are made at specification level regenerating the software components testing and integrating them with the system Eventually software maintenance has to manage the evolution and evolutionary characteristics of software systems Software professionals have to maintain not only the software but the momentum of change in systems and software In this study we observe various issues tools and techniques and the emerging trends in software technology with particular reference to maintenance We are not searching for specific solutions We are identifying issues and finding ways to manage them live with them and control their negative impact **MVS Performance**

Management (ESA/390 Edition) Stephen L. Samson,1992 The September 1990 announcements for MVS ESA Version 4 have made major changes and enhancements to MVS and its systems environment New concepts and products like ESCON channels HCD PR SM SCF System View and others are covered as well as ES 9000 the new hardware based on ESA 390 architecture
