**DB2 for Windows NT - Fast** Mark Whitehorn, Mary Whitehorn, 1997-11-19 Currently IBM's DB2 is the most powerful database management software for large mainframe systems. Designed specifically for the Windows NT environment, the book starts with all the usual features including Windows NT remote administration, security, and performance features. However, it goes well beyond that to present the whole new level of performance and functionality offered by this new version, including tips on how to maximize its excellent user interface. Packaged with the book is a CD-ROM containing original IBM DB2 product code. *Business Intelligence: The IBM Solution* Mark Whitehorn, Mary Whitehorn, 1999-03-31 This book

concentrates on two aspects of business intelligence together with the associated IBM products: data warehousing with Visual Warehouse and on-line analytical processing using the DB2 OLAP Server. The book thus provides managers needing an overview as well as practitioners needing to understand and use these tools with all the information they need. PC Mag
