*Author and Audience in Vitruvius' De architectura* Marden Fitzpatrick Nichols, 2017-10-26 Vitruvius De architectura is the only extant classical text on architecture and its impact on Renaissance masters including Leonardo da Vinci is well known But what was the text's purpose in its own time ca 20s BCE In this book Marden Fitzpatrick Nichols reveals how Vitruvius pitched the Greek discipline of architecture to his Roman readers most of whom were undoubtedly laymen The inaccuracy of Vitruvius architectural rules when compared with surviving ancient buildings has knocked Vitruvius off his pedestal Nichols argues that the author never intended to provide an accurate view of contemporary buildings Instead Vitruvius crafted his authorial persona and remarks on architecture to appeal to elites and would be elites eager to secure their positions within an expanding empire In this major new analysis of De architectura from archaeological and literary perspectives Vitruvius emerges as a knowing critic of a social landscape in which the house made the man

*On Architecture* Vitruvius, 2009-09-24 In De architectura c 40 BC Vitruvius discusses in ten encyclopedic chapters aspects of Roman architecture engineering and city planning Vitruvius also included a section on human proportions Because it is the only antique treatise on architecture to have survived De architectura has been an invaluable source of information for scholars The rediscovery of Vitruvius during the Renaissance greatly fuelled the revival of classicism during that and subsequent periods Numerous architectural treatises were based in part or inspired by Vitruvius beginning with Leon Battista Alberti's De re aedificatoria 1485

*Ten Books on Architecture* Vitruvius, 2019-12-25 The architect should be equipped with knowledge of many branches of study and varied kinds of learning for it is by his judgement that all work done by the other arts is put to test This knowledge is the child of practice and theory Practice is the continuous and regular exercise of employment where manual work is done with any necessary material according to the design of a drawing Theory on the other hand is the ability to demonstrate and explain the productions of dexterity on the principles of proportion 1 While your divine intelligence and will Emperor Caesar were engaged in acquiring the right to command the world and while your fellow citizens when all their enemies had been laid low by your invincible valour were glorying in your triumph and victory while all foreign nations were in subjection awaiting your beck and call and the Roman people and senate released from their alarm were beginning to be guided by your most noble conceptions and policies I hardly dared in view of your serious employments to publish my writings and long considered ideas on architecture for fear of subjecting myself to your displeasure by an unseasonable interruption 2 But when I saw that you were giving your

attention not only to the welfare of society in general and to the establishment of public order but also to the providing of public buildings intended for utilitarian purposes so that not only should the State have been enriched with provinces by your means but that the greatness of its power might likewise be attended with distinguished authority in its public buildings I thought that I ought to take the first opportunity to lay before you my writings on this theme For in the first place it was this subject which made me known to your father to whom I was devoted on account of his great qualities After the council of heaven gave him a place in the dwellings of immortal life and transferred your father's power to your hands my devotion continuing unchanged as I remembered him inclined me to support you And so with Marcus Aurelius Publius Minidius and Gnaeus Cornelius I was ready to supply and repair ballistae scorpiones and other artillery and I have received rewards for good service with them After your first bestowal of these upon me you continued to renew them on the recommendation of your sister 3 Owing to this favour I need have no fear of want to the end of my life and being thus laid under obligation I began to write this work for you because I saw that you have built and are now building extensively and that in future also you will take care that our public and private buildings shall be worthy to go down to posterity by the side of your other splendid achievements I have drawn up definite rules to enable you by observing them to have personal knowledge of the quality both of existing buildings and of those which are yet to be constructed For in the following books I have disclosed all the principles of the art      *Observations on Vitruvii de architectura libri decem with special regard to the time at which this work was written* Johan Ludvig Ussing, 1898      *Vitruvius* Vitruvius, 2010-05-22 Complete and Illustrated Edition Vitruvius Marcus V Pollio Roman architect and engineer studied Greek philosophy and science and gained experience in the course of professional work He was one of those appointed to be overseers of imperial artillery or military engines and was architect of at least one unit of buildings for Augustus in the reconstruction of Rome Late in life and in ill health he completed sometime before 27 BCE *De Architectura* which after its rediscovery in the fifteenth century was influential enough to be studied by architects from the early Renaissance to recent times His ten books on architecture give great insight into Greco Roman culture and life The topics relating to architecture comprise many things that would surprise a modern reader but were considered an integral part of life 2000 years ago Consideration of these things might help make modern cities more pleasant to live in and deserve the attention of architects      **Author and Audience in Vitruvius' *De architectura*** Marden Fitzpatrick Nichols, 2017-10-26 Vitruvius *De architectura* is the only extant classical text on architecture and its impact on Renaissance masters including Leonardo da Vinci is well known But what was the text's purpose in its own time ca 20s BCE In this book Marden Fitzpatrick Nichols reveals how Vitruvius pitched the Greek discipline of architecture to his Roman readers most of whom were undoubtedly laymen The inaccuracy of Vitruvius architectural rules when compared with surviving ancient buildings has knocked Vitruvius off his pedestal Nichols argues that the author never intended to provide an accurate view of contemporary buildings Instead Vitruvius crafted his authorial persona and remarks on architecture to

appeal to elites and would be elites eager to secure their positions within an expanding empire In this major new analysis of De architectura from archaeological and literary perspectives Vitruvius emerges as a knowing critic of a social landscape in which the house made the man Ten Books on Architecture Vitruvius Pollio, 2019-12-20 Ten Books on Architecture or De Architectura by Marcus Vitruvius Pollio is the most complete treatise on the subject of architecture to survive from antiquity and has influenced the construction and design of major buildings since the Renaissance Vitruvius lived during the first century BC and was an important architect as well as a civil and military engineer in the Roman Empire Vitruvius dedicated this work to his patron the emperor Caesar Augustus and included information on both Roman and Greek buildings detailed directions on how to build military camps his theories on city planning and guidance on how to construct large public structures such as aqueducts public baths harbors and buildings as well as small more personal items such as measuring devices and instruments Ten Books on Architecture is not only an excellent historical reference into ancient construction methods and aesthetics but also a manual providing direction and wisdom that can be applied to architecture today Students of both classic and modern architecture and engineering will find much of interest in this fully illustrated reproduction of the 1914 edition translated by Morris Hicky Morgan This edition is printed on premium acid free paper Vitruvii De architectura libri decem Vitruvius Pollio, 1867 **De architectura** Vitruvius Pollio, 1912 **The Ten Books on Architecture** Vitruvius Pollio, Morris Hicky Morgan, Herbert Langford Warren, Nelson Robinson, 2013-09-29 The Ten Books on Architecture Complete New Student Edition By Vitruvius Pollio Marcus Vitruvius Pollio born c 80 70 BC died after c 15 BC was a Roman author architect and engineer during the 1st century BC perhaps best known for his multi volume work entitled De Architectura By his own description Vitruvius served as a ballista artilleryman the third class of arms in the military offices He likely served as chief of the ballista senior officer of artillery in charge of doctores ballistarum artillery experts and libratores who actually operated the machines Little is known about Vitruvius life Most inferences about him are extracted from his only surviving work De Architectura His first name Marcus and his cognomen Pollio are uncertain He was possibly a praefectus fabrum during military service or praefectus architectus armamentarius of the apparitor status group During the last years of his life Professor Morgan had devoted much time and energy to the preparation of a translation of Vitruvius which he proposed to supplement with a revised text illustrations and notes He had completed the translation with the exception of the last four chapters of the tenth book and had discussed with Professor Warren the illustrations intended for the first six books of the work the notes had not been arranged or completed though many of them were outlined in the manuscript or the intention to insert them indicated The several books of the translation so far as it was completed had been read to a little group of friends consisting of Professors Sheldon and Kittredge and myself and had received our criticism which had at times been utilized in the revision of the work After the death of Professor Morgan in spite of my obvious incompetency from a technical point of view I undertook at the request of his family to complete the translation and to see

the book through the press I must therefore assume entire responsibility for the translation of the tenth book beginning with chapter thirteen and further responsibility for necessary changes made by me in the earlier part of the translation changes which in no case affect any theory held by Professor Morgan but which involve mainly the adoption of simpler forms of statement or the correction of obvious oversights
