

The Anxiety of Interdisciplinarity

A black and white photograph of a man with dark hair and glasses, wearing a white button-down shirt and a dark tie. He is standing in a modern, brightly lit interior space with large windows in the background. His arms are crossed, and he is looking towards the camera.

De Dis Ex Vol 1 Excavating Modernism:

Cultural Studies ,2016-09-12 This volume claims that interdisciplinarity and translation constitute the two main challenges for cultural studies today These conceptual issues inter and trans express themselves within specific historical and cultural contexts Interdisciplinarity is linked with the ongoing process of the institutionalisation of cultural studies in national academies but also increasingly internationally comparatively and to a certain extent even globally of cultural studies of global culture Translation concerns cultural studies both as an object or product and as a subject or producer of translation processes Cultural studies is the result of translation translates and is being translated The essays in this volume therefore relate these various ongoing cultural linguistic and institutional translation processes to political and ethical issues of internationalisation and globalisation The contributions draw their originality and strength from strategically crossing disciplinary and national boundaries They deliberately ignore the question of what may be proper to cultural studies and instead problematise the notions of propriety and belonging As a reading practice cultural studies in these pages is performed through adaptations and combinations of theory and critical practice The volume should be of interest to everyone concerned with cultural studies role in promoting intellectual debate within an increasingly international and globalised public sphere

contents *Politics of Urban Knowledge* Bert De Munck, Jens Lachmund, 2023-03-23 This book uses politics of urban knowledge as a lens to understand how professionals, administrations, scholars and social movements have surveyed, evaluated and theorized the city, identified problems and shaped and legitimized practical interventions in planning and administration. Urbanization has been accompanied and partly shaped by the formation of the city as a distinct domain of knowledge. This volume uses politics of urban knowledge as a lens to develop a new perspective on urban history and urban planning history. Through case studies of mainly 19th and 20th century examples, the book demonstrates that urban knowledge is not simply a neutral means to represent cities as pre-existing entities but rather the outcome of historically contingent processes and practices of urban actors addressing urban issues and the power relations in which they are embedded. It shows how urban knowledge making has reshaped the categories, rationales and techniques through which urban spaces were produced, governed and contested, and how the knowledge concerned became performative of newly emerging urban orders. The volume will be of interest to scholars and students in the field of urban history and urban studies as well as the history of technology, science and knowledge and of science studies *Building Knowledge, Constructing Histories, volume 2* Ine Wouters, Stephanie Voorde, Inge Bertels, Bernard Espion, Krista Jonge, Denis Zastavni, 2018-07-11 *Building Knowledge, Constructing Histories* brings together the papers presented at the Sixth International Congress on Construction History 6ICCH Brussels Belgium 9-13 July 2018. The contributions present the latest research in the field of construction history covering themes such as Building actors, Building materials, The process of building, Structural theory and analysis, Building services and techniques, Socio-cultural aspects, Knowledge transfer, The discipline of Construction History. The papers cover various types of buildings and structures from ancient times to the 21st century from all over the world. In addition, thematic papers address specific themes and highlight new directions in construction history research, fostering transnational and interdisciplinary collaboration. *Building Knowledge, Constructing Histories* is a must-have for academics, scientists, building conservators, architects, historians, engineers, designers, contractors and other professionals involved or interested in the field of construction history. This is volume 2 of the book set *Subject Guide to Books in Print*, 2001 *Missionary Spaces* Thomas Coomans, 2024-05-02 The spatial turn of missionary places. Situated at the crossroads of missionary history, imperial history and colonial architecture, this volume examines the architectural staging and spatial implications of the worldwide expansion of Christianity in the nineteenth and twentieth centuries. By focusing on specific architectural fragments, analysing the intersection of Christian edifices in colonial and traditional urban settings or unravelling the social understanding of missionary places, each chapter strives to understand the agency of missionary spaces. Bringing together scholars from different disciplines and fields, this book aims to centre those missionary spaces by approaching them not merely as a container around and within which the missionary encounter was acted but by making them part and parcel of it. Through its approach, *Missionary Spaces* provides a new paradigm for scrutinising the spatial turn for

missionary histories and contributes to the increased attention across the humanities to space place and location since the late 1990s Space does not occur as an historical given but as a social construction to be analysed while at the same time having explanatory value of its own This book focuses on Africa and the Chinese Region with contributions on Burundi China Congo Egypt Ghana Kenya and Taiwan **Forms of Transculturation** Justin Andrew Read,2002 *The Routledge Handbook of Language and the Global South/s* Sinfree Makoni,Anna Kaiper-Marquez,Lorato Mokwena,2022-08-25 This Handbook centers on language s in the Global South s and the many ways in which both language and the Global South are conceptualized theorized practiced and reshaped Drawing on 31 chapters situated in diverse geographical contexts and four additional interviews with leading scholars this text showcases Issues of decolonization Promotion of Southern epistemologies and theories of the Global South s A focus on social applied linguistics An added focus on the academy A nuanced understanding of global language scholarship It is written for emerging and established scholars across the globe as it positions Southern epistemologies language scholarship and decolonial theories into scholarship surrounding multiple themes and global perspectives *Artbibliographies Modern* ,1998 **Concrete** Catherine Croft,Susan Macdonald,2019-01-15 The first title in a new series aimed at sharing best practices in the conservation of modern heritage This timely volume brings together fourteen case studies that address the challenges of conserving the twentieth century s most ubiquitous building material concrete Following a meeting of international heritage conservation professionals in 2013 the need for recent thorough and well vetted case studies on conserving twentieth century heritage became clear Concrete Case Studies in Conservation Practice answers that need and kicks off a new series Conserving Modern Heritage aimed at sharing best practices The projects selected represent a range of building typologies building uses and project sizes from the high rise housing blocks of Le Corbusier s Unit d Habitation and public buildings such as the London s National Theatre to small monuments such as the structures at Dudley Zoological Gardens and a sculpture by Donald Judd The projects also represent a range of environmental and economic contexts Some projects benefit from high levels of heritage protection and access to funding while others have had to negotiate conservation with stringent cost limitations All follow a rigorous conservation approach beginning with a process of investigation and diagnosis to identify causes and target repairs and balancing these with conservation requirements to preserve significance Written by architects engineers conservators scholars and other professionals in the field these highly detailed and well illustrated studies demonstrate sound practice rigorous methodology and technological innovation and represent the vibrancy of the field as it stands today This book has something to offer anyone interested in the conservation of modern heritage [The Haraway Reader](#) Donna Jeanne Haraway,2004 First Published in 2004 Routledge is an imprint of Taylor Francis an informa company **The New International Encyclopædia** Frank Moore Colby,Talcott Williams,1929 **Scientific American** ,1917 **Fourth Estate** ,1913 **Time** Briton Hadden,Henry Robinson Luce,1925 Reels for 1973 include Time index 1973 **Vanity Fair** ,1922
