Human Capital versus Basic Income Fabian A Borges, 2022-02-23 Latin America underwent two major transformations during the 2000s the widespread election of left leaning presidents the so called left turn and the diffusion of conditional cash transfer programs CCTs innovative social programs that award regular stipends to poor families on the condition that their children attend school Combining cross national quantitative research covering the entire region and in depth case studies based on field research Human Capital versus Basic Income Ideology and Models for Anti Poverty Programs in Latin America challenges the conventional wisdom that these two transformations were unrelated In this book author Fabian A Borges demonstrates that this ideology greatly influenced both

the adoption and design of CCTs There were two distinct models of CCTs a human capital model based on means tested targeting and strict enforcement of program conditions exemplified by the program launched by Mexico's right and a more universalistic basic income model with more permissive enforcement of conditionality exemplified by Brazil's program under Lula These two models then spread across the region Whereas right and center governments with assistance from international financial institutions enacted CCTs based on the human capital model the left with assistance from Brazil enacted CCTs based on the basic income model The existence of two distinct types of CCTs and their relation to ideology is supported by quantitative analyses covering the entire region and in depth case studies based on field research in three countries Left wing governments operate CCTs that cover more people and spend more on those programs than their center or right wing counterparts Beyond coverage a subsequent analysis of the 10 national programs adopted after Lula's embrace of CCTs confirms that program design evaluated in terms of scope of the target population strictness of conditionality enforcement and stipend structure is shaped by government ideology This finding is then fleshed out through case studies of the political processes that culminated in the adoption of basic income CCTs by left wing governments in Argentina and Bolivia and a human capital CCT by a centrist president in Costa Rica

Averting a Global Environmental Collapse Thomas Reuter, 2015-10-05 The numerous and varied indicators of environmental risks point toward the likelihood of a systemic and catastrophic ecological failure at some point during this century Political inaction and cultural resistance meanwhile are even preventing the implementation of already available technical solutions which has led many experts to conclude that averting a global environmental catastrophe is foremost a socio political rather than a technical challenge The World Science Union ICSU has recognized that knowledge of the social sciences is indispensable for facilitating the major socio cultural transformations now required and together with the International Social Science Council ISSC called for a mainstreaming of environmental research in the social sciences at the Rio 20 Earth Summit The two major international organizations in anthropology IUAES and WCAA responded to this call by co sponsoring a symposium on environmental change at the Manchester World Anthropology Congress and by creating a scientific Commission for Anthropology and Environment which then hosted a second symposium in Chiba City Tokyo in May 2014 This volume is a selection of the many papers presented by a truly international group of experts at the two symposia It identifies and provides case study examples in six major research areas where anthropology and local and indigenous people's knowledge can make a significant contribution Environmental Vulnerability and Risk Perceptions Sustainable Urban Environments Sustainable Rural Environments and Food Security Indigenous People and Nature Conservation Environmental Justice and Corporate Social Responsibility and Sustainable Resource Management Contributors represent nine different national anthropologies across all continents The volume thus also enacts a new world anthropologies paradigm first proposed by the World Anthropologies Network WAN which aspires to unify and globalize the discipline in a spirit of equality and mutual respect among scholars across all national traditions and

language barriers Furthermore the volume will also support teaching and promote further research in the anthropology of the environment *Handbook of Research on Global Indicators of Economic and Political Convergence* Das, Ramesh Chandra, 2016-07-27 The development of a nation can be influenced by a wide range of factors In the modern era of globalization under developed countries must strive to catch up to developed nations and establish themselves in the global market The Handbook of Research on Global Indicators of Economic and Political Convergence is a pivotal reference source for the latest scholarly research on social political and environmental variables that affect the ability of developing countries to reach an equal standing in the global economy Highlighting theoretical foundations critical analyses and real world perspectives this book is ideally designed for researchers analysts professionals and upper level students interested in emerging convergence and divergence trends in modern countries

El desafío de la igualdad Horacio Rodríguez Larreta, Gonzalo Robredo, 1999 La necesidad de dar una respuesta a los millones de argentinos que se encuentran en situacion de pobreza resulta una responsabilidad ineludible por parte del Estado Esta es una de las asignaturas pendientes que enfrenta nuestra sociedad Asi el combate a la pobreza se ha convertido en un imperativo etico y moral a la vez que una condicion necesaria para alcanzar el verdadero desarrollo como pais Que sociedad es posible frente a una exclusion cada vez mayor de amplios sectores de la poblacion que integracion y consenso puede generar la implementacion de cualquier politica publica en un ambito de desigualdad y polarizacion social Adem as de la responsabilidad etica la pobreza condiciona la soluci3n de otros problemas que sufre nuestra sociedad Los niveles crecientes de violencia no podran detenerse sin actuar sobre la brecha de oportunidades cada vez mayor entre los distintos sectores socioeconomicos Una mejor distribucion del capital humano no sera posible si casi la mitad de los ninos argentinos vive en familias pobres donde sus privaciones en terminos de salud educacion y alimentacion limitaran sus posibilidades futuras y las de las familias que conformen El crecimiento economico que nuestro pais ha

registrado en la última década es una condición necesaria para un mejoramiento de la calidad de vida de la población. Sin embargo, por sí solo no ha sido suficiente para ampliar las oportunidades de desarrollo en todas las regiones del país, impulsar una distribución más equitativa del ingreso y eliminar las condiciones de marginalidad en las que viven muchos argentinos. A lo largo de estas páginas presentamos una propuesta que contribuye a superar uno de los principales problemas que sufre nuestro país: la situación de pobreza en la que viven millones de argentinos. Más allá de que el problema social esté incorporado en la agenda pública, la forma de encararlo puede condicionar fuertemente el éxito de lo que se haga.

Resumen Tras una discusión conceptual del término cuasimercados y de los desafíos que implica reunir eficiencia y equidad en su desarrollo se distinguen tres escenarios de la región de acuerdo con la vigencia e impugnación de los principios de solidaridad y universalidad en la prestación de servicios para abordar las reformas de gestión de Chile, Colombia, Argentina y Costa Rica. Se analiza su grado de avance y los obstáculos que enfrentan considerando los modelos de financiamiento, los modelos de salud, la capacidad regulatoria, su basamento jurídico y su vínculo con los procesos de descentralización y el perfil de los instrumentos de medicina de desempeño.
