De Kleine Ark:

The Shifting Sands of the North Sea Lowlands Katie Ritson, 2018-10-26 Global seawater levels are rising and the low lying coasts of the North Sea basin are amongst the most vulnerable in Europe. In our current moment of environmental crisis the North Sea coasts are literary arenas in which the challenges and concerns of the Anthropocene are being played out. This book shows how the fragile landscapes around the North Sea have served as bellwethers for environmental concern both now and in the recent past. It looks at literary sources drawn from the countries around the North Sea: Denmark, Germany, the Netherlands and England from the mid nineteenth century onwards, taking them out of their established national and cultural contexts and reframing them in the light of human concern with fast changing and hazardous environments. The six chapters serve as literary case studies that highlight memories of flood disaster and recovery attempts to engineer the landscape into submission, perceptions of the landscape as both local and global and the imagination of the future of our planet. This approach which combines environmental history and ecocriticism shows the importance of cultural artefacts in understandings of and responses to environmental change and advocates for the importance of literary studies in the environmental humanities. This book will be of great interest to students and scholars of the Environmental Humanities including Eco criticism and Environmental History as well as anyone studying literature from the Germanic philologies.

Water Lotte Jensen, 2024-01-19 Floods are a fundamental part of Dutch history. Indeed, having tamed the threats associated with living below sea level is part of Dutch national identity. In the cultural depictions of these devastating events, however, national pride at a certain collective resilience goes hand in hand with the collective trauma of exposed vulnerability. All too often the Dutch were the losers in these battles against the elements. In a time of rising global sea levels, cultural scholar Lotte Jensen dives into the stories and images of the past to unpack this paradox for today. Over the centuries, large parts of the Netherlands have been progressively reclaimed from its river delta home. Throughout that process, the country suffered countless floods, a number of which were truly catastrophic, such as the Saint Elizabeth's Flood of 1421 or the North Sea Flood of 1953. Jensen describes how the Dutch have dealt with these disasters in practice but also in the imagination. It is the story of babies in floating cradles, fatherly monarchs, community fundraisers and the boy who stuck his finger in the dike. Centuries before the nation building associated with the 1800s, the Dutch created a unifying us-the image of the Dutch lion against a them-the waterwolf, the major threat which water embodied. This national feeling and narrative were crafted with a set repertoire of images, role models, heroes and monarchs, charity, national and international solidarity and a culture of remembrance. Jensen gives particular attention to the at times funny poems, books and songs later criticized as clichéd or melodramatic which these collective traumas inspired. She also demonstrates through monuments and works of art how this narrative has multiplied and acquired variations with time, right up to the present. Though once cast in a more religious light, the flood as punishment for a general lack of religious devotion, the waterwolf has become, for example, a collective

responsibility for the environment that begins with lifestyle choices Today the Netherlands lives with water more than it battles it some thinkers even envisioning an amphibian future for the country The stories and images of the past however reveal that precisely vulnerability can be fertile ground for solidarity and togetherness With rising sea levels representing a growing threat this well researched and highly readable cultural history shows how over time a culture s imagination can gain new relevance beyond its borders Acknowledging and building from a place of collective vulnerability might now be more important than ever **Bibliographia Neerlandica** A. M. P. Mollema,1962 The National Union Catalog ,1961

General Catalogue of Printed Books British Museum. Dept. of Printed Books,1961 **Pasture Landscapes and Nature Conservation** Bernd Redecker,Werner Härdtle,Peter Finck,Uwe Riecken,Eckhard Schröder,2002-05-28 One of the main problems and aims of nature conservation in Europe is to protect semi open landscapes The development during the past decades is characterized by an ongoing intensification of land use on the one hand and an increasing number of former meadows and pastures lying fallow caused by changing economic conditions on the other hand In several countries the establishment of larger pasture landscapes with a mixed character of open grassland combined with shrubs and forests has been recognized as one solution to this problem The book gives an overview of the European projects concerning to this topic nature conservation policy and strategies scientific results and practical experiences creating large scale grazing systems
