De Gaulle Au Pra Sent:

Cold War and Decolonization in Guinea, 1946-1958 Elizabeth Schmidt, 2007-09-25 In September 1958 Guinea claimed its independence rejecting a constitution that would have relegated it to junior partnership in the French Community. In all the French empire Guinea was the only territory to vote No. Orchestrating the No vote was the Guinean branch of the Rassemblement Démocratique Africain (RDA), an alliance of political parties with affiliates in French West and Equatorial Africa and the United Nations trusts of Togo and Cameroon. Although Guinea's stance vis-à-vis the 1958 constitution has been recognized as unique, until now the historical roots of this phenomenon have not been adequately explained. Clearly written and free of jargon, *Cold War and Decolonization in Guinea* argues that Guinea's vote for independence was the culmination of a decade-long struggle between local militants and political leaders for control of the political agenda. Since 1950, when RDA representatives in the French parliament severed their ties to the French Communist Party, conservative elements had dominated the RDA. In Guinea, local cadres had opposed the break. Victimized by the administration and sidelined by their own leaders, they quietly rebuilt the party from the base. Leftist militants, their voices muted throughout most of the decade, gained preeminence in 1958 when trade unionists, students, the party's women's and youth wings, and other grassroots actors pushed the Guinean RDA to endorse a No vote. Thus, Guinea's rejection of the proposed constitution in favor of immediate independence was not an isolated aberration. Rather, it was the outcome of years of political mobilization by activists who, despite Cold War repression, ultimately pushed the Guinean RDA to the left. The significance of this highly original book, based on previously unexamined archival records and oral interviews with grassroots activists, extends far beyond its primary subject. In illuminating the Guinean case, Elizabeth Schmidt helps us understand the dynamics of decolonization and its legacy for postindependence nation building in many parts of the developing world. Examining Guinean history from the bottom up, Schmidt considers local politics within the larger context of the Cold War, making her book suitable for courses in African history and politics, diplomatic history, and Cold War history.

Citizenship between Empire and Nation Frederick Cooper, 2016-05-31 A groundbreaking history of the last days of the French empire in Africa. As the French public debates its present diversity and its colonial past, few remember that between 1946 and 1960 the inhabitants of French colonies possessed the rights of French citizens. Moreover, they did not have to conform to the French civil code that regulated marriage and inheritance. One could, in principle, be a citizen and different too. *Citizenship between Empire and Nation* examines momentous changes in notions of citizenship, sovereignty, nation state, and empire in a time of acute uncertainty about the future of a world that had earlier been divided into colonial empires. Frederick Cooper explains how African political leaders at the end of World War II strove to abolish the entrenched distinction between colonial subject and citizen. They then used their new status to claim social, economic, and political equality with other French citizens in the face of resistance from defenders of a colonial order. Africans balanced their quest for equality with a desire to express an African

political personality They hoped to combine a degree of autonomy with participation in a larger Franco African ensemble French leaders trying to hold on to a large French polity debated how much autonomy and how much equality they could concede Both sides looked to versions of federalism as alternatives to empire and the nation state The French government had to confront the high costs of an empire of citizens while Africans could not agree with French leaders or among themselves on how to balance their contradictory imperatives Cooper shows how both France and its former colonies backed into more national conceptions of the state than either had sought La grande encyclopédie ,1885 **Author - Title**
