**Young Children in the World and Their Rights** Adrijana Višnjić-Jevtić, Alicja R. Sadownik, Ingrid Engdahl, 2021-04-20  
This book provides different perspectives on the concept of children's rights including policy educational and children's perspectives. It examines how the crucial ideas of the Convention on the Rights of the Child are respected and implemented in 14 countries in five regions of the world. It looks at early childhood education, children's participatory rights and at how these rights are promoted and guaranteed in different countries. It explores the professional practice of education and its complexities, challenges and dilemmas as well as the role of play and of listening and participation. The book advocates children's rights today, arguing for its vital importance in the best interests of the children. In doing so, it furthers the understanding of children's rights and spreads knowledge about the Convention as a means of celebrating its 30th anniversary. The UN Convention on the Rights of the Child (UNCRC) comprises the potential to change the lives of children to the very best. It may exalt children from the position of marginalized citizens to the centre of policies all over the world. Even though the concept of children's rights is omnipresent, the respect for children's rights must be discussed. While the Convention brings the new perspective of children as citizens to the world, there are still challenges in its application. The book interrogates challenges in understanding and applying children's rights and offers possible answers to these challenges. The ratification process itself does not guarantee that children's rights are respected. While all adults should take responsibility for implementing the UNCRC in everyday life, Early Childhood Education should give opportunities for children to learn and live their rights. Children Philosophize Worldwide Eva Marsal, Takara Dobashi, Barbara Weber, 2009  
Philosophizing for with and by children in a community of inquiry has proven to be an internationally successful learning strategy that enhances both the cognitive and emotional growth of children. Pioneering democratic programs for philosophizing with children now exist throughout the world. The work described in this book represents the latest research on theoretical concepts and applied projects within this field and brings together contributions from twenty-nine countries representing all continents. The authors address questions on the theoretical foundation of Philosophy for Children, the application of philosophical methods, the community of inquiry, international and national didactical concepts as well as the evaluation of those concepts. A primary goal of this book is to enhance intercultural academic exchange and to encourage further research and practical work in this field. **Women Build the Welfare State** Donna J.
