## **Deadfall Generations Of Logging In The Pacific Northwest:**

Deadfall James LeMonds, 2001 Logging has been a way of life in the Pacific Northwest a thread woven into the character of communities for more than a century And in this far corner James LeMonds s family has done about every job in the woods working as high climbers and whistle p

**In the Path of Destruction** Richard Waitt, 2020-10-14 A napping volcano blinked awake in March 1980 Two months later when that mountain roared Jim Scymanky was about twelve miles northwest logging a north slope above Hoffstadt Creek Rocks zinged through the woods bouncing off trees then the tops of trees snapped off Suddenly I could see nothing it got hot right away then scorching hot and impossible to breathe The air had no oxygen like being trapped underwater I was being cremated the pain unbearable Steve Malone at the University of Washington Seismology Laboratory was inconsolable We d failed For two months we d counted and located thousands of earthquakes looked for changes to anticipate an eruption Then it just happened It killed many people It killed David Johnston We could hardly work Author Richard Waitt was part of a U S Geological Survey team doing volcano research in the Cascades and was one of the first to arrive following the mountain s early rumblings His journey collecting eyewitness accounts began with a conversation in a bar the third week after Mount St Helens erupted The couple he met barely outraced a searing ash cloud and Waitt realized their experiences could inform geologic studies He eventually conducted hundreds of interviews sometimes two and three decades later often making multiple visits to gather additional details correct errors and resolve discrepancies A meticulous scientist with intimate knowledge of Mount St Helens Waitt delivers a detailed and accurate chronicle of events He tapped numerous primary sources interviews legal depositions personal diaries geologists field notes radio logs and police records Newspaper stories and even sun shadows on photographs revealed additional intricacies In the Path of Destruction s eruption story unfolds through unforgettable riveting narratives the heart of a masterful chronology that also delivers engrossing science history and journalism

Eruption Steve Olson, 2016-03-03 A riveting history of the Mount St Helens eruption that will long stand as a classic of descriptive narrative Simon Winchester For months in early 1980 scientists journalists sightseers and nearby residents listened anxiously to rumblings in Mount St Helens part of the chain of western volcanoes fueled by the 700 mile long Cascadia fault Still no one was prepared when an immense eruption took the top off of the mountain and laid waste to hundreds of square miles of verdant forests in southwestern Washington State The eruption was one of the largest in human history deposited ash in eleven U S states and five Canadian providences and caused more than one billion dollars in damage It killed fifty seven people some as far as thirteen miles away from the volcano s summit Shedding new light on the cataclysm author Steve Olson interweaves the history and science behind this event with page turning accounts of what happened to those who lived and those who died Powerful economic and historical forces influenced the fates of those around the volcano that sunny Sunday morning including the construction of the nation s railroads the harvest of a continent s vast forests and the protection of America s

treasured public lands The eruption of Mount St Helens revealed how the past is constantly present in the lives of us all At the same time it transformed volcanic science the study of environmental resilience and ultimately our perceptions of what it will take to survive on an increasingly dangerous planet Rich with vivid personal stories of lumber tycoons loggers volcanologists and conservationists Eruption delivers a spellbinding narrative built from the testimonies of those closest to the disaster and an epic tale of our fraught relationship with the natural world *Fashioning Identity* Maria Mackinney-Valentin, 2017-02-09 We dress to communicate who we are or who we would like others to think we are telling seductive fashion narratives through our adornment Yet today fashion has been democratized through high low collaborations social media and real time fashion mediation complicating the basic dynamic of identity displays and creating tension between personal statements and social performances Fashioning Identity explores how this tension is performed through fashion production and consumption by examining a diverse series of case studies from ninety year old fashion icons to the paradoxical rebellion in normcore and from soccer jerseys in Kenya to heavy metal band T shirts in Europe Through these cases the role of time gender age memory novelty copying the body and resistance are considered within the context of the contemporary fashion scene Offering a fresh approach to the subject by readdressing Fred Davis seminal concept of identity ambivalence in Fashion Culture and Identity 1992 Mackinney Valentin argues that we are in an epoch of status ambivalence in which fashioning one s own identity has become increasingly complicated *Tree Thieves* Lyndsie Bourgon, 2022-06-21 SHORTLISTED FOR THE COLUMBIA SCHOOL OF JOURNALISM J ANTHONY LUKAS BOOK AWARD LONGLISTED FOR THE 2023 PEN JOHN KENNETH GALBRAITH AWARD FOR NONFICTION FINALIST FOR THE NELLIE BY CHANTICLEER INTERNATIONAL BOOK AWARDS FOR JOURNALISTIC NON FICTION A gripping investigation of the billion dollar timber black market and a fascinating examination of the deep and troubled relationship between people and forests Michelle Nijhuis author of Beloved Beasts There s a strong chance that chair you are sitting on was made from stolen lumber In Tree Thieves Lyndsie Bourgon takes us deep into the underbelly of the illegal timber market As she traces three timber poaching cases she introduces us to tree poachers law enforcement forensic wood specialists the enigmatic residents of former logging communities environmental activists international timber cartels and indigenous communities along the way Old growth trees are invaluable and irreplaceable for both humans and wildlife and are the oldest living things on earth But the morality of tree poaching is not as simple as we might think stealing trees is a form of deeply rooted protest and a side effect of environmental preservation and protection that doesn t include communities that have been uprooted or marginalized when park boundaries are drawn As Bourgon discovers failing to include working class and rural communities in the preservation of these awe inducing ecosystems can lead to catastrophic results Featuring excellent investigative reporting fascinating characters logging history political analysis and cutting edge tree science Tree Thieves takes readers on a thrilling journey into the intrigue crime and incredible complexity sheltered under the forest canopy *Wild Logging*

**Current Contents** Institute for Scientific Information (Philadelphia), 2002      Pacific Northwest Quarterly, 1999      **To Harvest, to Hunt** Judy Li, Judy L. Li, 2007 To Harvest To Hunt is a rich collection of writings that reveals how diverse peoples have valued and used natural resources throughout the history of the American West. Drawing on family letters, oral traditions, historical records, and personal experience, the book's contributors offer readers new perspectives on the land they live on, the harvests they consume, and the natural resources they manage. Editor Judy Li weaves a tapestry of cultures and voices from Pueblo tribes in the Southwest and Chinese fishermen in California to Mexican braceros in Oregon and Basque sheepherders in Idaho as she details the region's historical dependence on the land and sea. Otter, walrus, abalone, grasslands, timber, and water are some of the vital resources discussed by anthropologists, historians, and biologists in stories that tell how cultures struggle to adapt in changing environments. Acclaimed novelist John Nichols, environmental lawyer Charles Wilkinson, and essayist David Mas Masumoto are among the contributors to this collection. Spanning the last 200 years, To Harvest To Hunt represents Native American, Native Alaskan, European, and Asian immigrants as varied in their perspectives as the landscapes the book describes. Students, scholars, and general readers will come to appreciate the region's once abundant resources and find this book an illuminating overview of the dynamic between people and the land.      *The Western Historical Quarterly*, 2001      **Journal of the West** Lorrin L.
