Practical Guide to Machine Learning, NLP, and Generative AI: Libraries, Algorithms, and Applications T.

Mariprasath,Kumar Reddy Cheepati,Marco Rivera,2024-12-23 This is an essential resource for beginners and experienced practitioners in machine learning This comprehensive guide covers a broad spectrum of machine learning topics starting with an in depth exploration of popular machine learning libraries Readers will gain a thorough understanding of Scikit learn TensorFlow PyTorch Keras and other pivotal libraries like XGBoost LightGBM and CatBoost which are integral for efficient model development and deployment The book delves into various neural network architectures providing readers with a solid foundation in understanding and applying these models Beginning with the basics of the Perceptron and its application in digit classification it progresses to more complex structures such as multilayer perceptrons for financial forecasting radial basis function networks for air quality prediction and convolutional neural networks CNNs for image classification Additionally the book covers recurrent neural networks RNNs and their variants like long short term memory LSTM and gated recurrent units GRUs which are crucial for time series analysis and sequential data applications Supervised machine learning algorithms are meticulously explained with practical examples to illustrate their application The book covers logistic regression and its use in predicting sports outcomes decision trees for plant classification random forests for traffic prediction and support vector machines for house price prediction Gradient boosting machines and their applications in genomics AdaBoost for bioinformatics data classification and extreme gradient boosting XGBoost for churn prediction are also discussed providing readers with a robust toolkit for various predictive tasks Unsupervised learning algorithms are another significant focus of the book introducing readers to techniques for uncovering hidden patterns in data Hierarchical clustering for gene expression data analysis principal component analysis PCA for climate predictions and singular value decomposition SVD for signal denoising are thoroughly explained The book also explores applications like robot navigation and network security demonstrating the versatility of these techniques Natural language processing NLP is comprehensively covered highlighting its fundamental concepts and various applications The book discusses the overview of NLP its fundamental concepts and its diverse applications such as chatbots virtual assistants clinical NLP applications and social media analytics Detailed sections on text pre processing syntactic analysis machine translation text classification named entity recognition and sentiment analysis equip readers with the knowledge to build sophisticated NLP models The final chapters of the book explore generative AI including generative adversarial networks GANs for image generation variational autoencoders for vibrational encoder training and autoregressive models for time series forecasting It also delves into Markov chain models for text generation Boltzmann machines for pattern recognition and deep belief networks for financial forecasting Special attention is given to the application of recurrent neural networks RNNs for generation tasks such as wind power plant predictions and battery range prediction showcasing the practical implementations of generative AI in various fields

[A Comprehensive Guide to Earning Money with AI for Beginners](#) Luke Thompson,2025-07-02 AI Powered Income A Comprehensive Guide to Earning Money with AI for Beginners Step into the future of earning with AI Powered Income your

essential guide to turning the power of artificial intelligence into real practical income streams Perfect for beginners and side hustlers this book breaks down exactly how people are using popular AI tools like ChatGPT Midjourney Canva and others to launch freelance services create and sell content start e commerce stores automate YouTube channels and even trade smarter in the stock and crypto markets Whether you want to write blogs faster generate stunning art build faceless video channels or automate customer service with AI chatbots this guide shows you how With simple step by step instructions recommended tools and real world success stories you ll learn how to Build an AI assisted freelancing business Create and monetize AI generated content Design and sell digital art with zero graphic design skills Launch automated YouTube channels without being on camera Boost your trading and e commerce results using AI tools Set up passive income streams powered by automation No tech background No problem This book was written with you in mind clear accessible and focused on action If you re ready to harness AI not just as a tool but as a pathway to freedom flexibility and financial growth AI Powered Income is your blueprint

Data Labeling in Machine Learning with Python Vijaya Kumar Suda, 2024-01-31
Take your data preparation machine learning and GenAI skills to the next level by learning a range of Python algorithms and tools for data labeling Key Features Generate labels for regression in scenarios with limited training data Apply generative AI and large language models LLMs to explore and label text data Leverage Python libraries for image video and audio data analysis and data labeling Purchase of the print or Kindle book includes a free PDF eBook Book Description Data labeling is the invisible hand that guides the power of artificial intelligence and machine learning In today s data driven world mastering data labeling is not just an advantage it s a necessity Data Labeling in Machine Learning with Python empowers you to unearth value from raw data create intelligent systems and influence the course of technological evolution With this book you ll discover the art of employing summary statistics weak supervision programmatic rules and heuristics to assign labels to unlabeled training data programmatically As you progress you ll be able to enhance your datasets by mastering the intricacies of semi supervised learning and data augmentation Venturing further into the data landscape you ll immerse yourself in the annotation of image video and audio data harnessing the power of Python libraries such as seaborn matplotlib cv2 librosa openai and langchain With hands on guidance and practical examples you ll gain proficiency in annotating diverse data types effectively By the end of this book you ll have the practical expertise to programmatically label diverse data types and enhance datasets unlocking the full potential of your data What you will learn Excel in exploratory data analysis EDA for tabular text audio video and image data Understand how to use Python libraries to apply rules to label raw data Discover data augmentation techniques for adding classification labels Leverage K means clustering to classify unsupervised data Explore how hybrid supervised learning is applied to add labels for classification Master text data classification with generative AI Detect objects and classify images with OpenCV and YOLO Uncover a range of techniques and resources for data annotation Who this book is for This book is for machine learning engineers data scientists and data engineers who want

to learn data labeling methods and algorithms for model training Data enthusiasts and Python developers will be able to use this book to learn data exploration and annotation using Python libraries Basic Python knowledge is beneficial but not necessary to get started

Fourth IEEE International Conference on Automatic Face and Gesture Recognition, 2000 Presents nine sessions containing a total of 88 papers from a conference organized to provide a primary forum for current work on machine perception of humans and human actions Includes papers addressing face detection face tracking using statistical methods face tracking face tracking using structural methods face recognition tracking people and recognizing activities gesture recognition face expression and gaze direction structural models and biological vision and 3D models Invited talks address such topics as the use of computer graphics to study the recognition of facial attributes problems in the description and interpretation of gesture in conversation and other topics Illustrated throughout in b w Lacks a subject index

A New Guide to Artificial Intelligence Derek Partridge, 1991 Textbook includes both theories and programs and covers all recognized AI work in sufficient detail to allow a critique from general concerns to be anchored whenever possible in the structure of specific AI programs Amazon com
