Critiquing Generative AI in Africa's Media Ecosystems Lungile A. Tshuma, Trust Matsilele, 2025-11-17 This book takes a critical approach to the rise of Artificial Intelligence (AI) within the media and communication landscape. The book argues that as technology is a social construct reflecting existing power dynamics, those in the Global South and in Africa, in particular, are bound to be marginalised and have their knowledge systems overlooked as the Global North dominates technological developments. The birth of AI has ignited debates about its benefits to lower-income countries, with some highlighting its potential to advance businesses and grow economies. However, this book argues that AI tools have been produced to serve Western needs, and that instead, there is a need for countries in Africa to have home-grown solutions defined by local values. Drawing on case studies and analysis from across the continent, the book seeks to caution, challenge, and proffer solutions to the use and understanding of Generative AI for media and communication in non-Western societies. At a time when generative AI is threatening to shape the future of media and communication around the world, this book is a vital and timely contribution to debates within critical data studies and African media studies.

The Routledge Handbook of Catalysts for a Sustainable Circular Economy Hanna Lehtimäki, Leena Aarikka-Stenroos, Ari Jokinen, Pekka Jokinen, 2023-11-30 This groundbreaking handbook leads the way in accelerating the transition to a sustainable circular economy by introducing the concept of a catalyst as a positive and enhancing driving force for sustainability. Catalysts create and maintain favourable conditions for complex systemic sustainability transition changes, and a discussion and understanding of catalysts is required to move from a linear economy to a sustainable and circular economy. With contributions from leading experts from around the globe, this volume presents theoretical insights, contextualised case studies, and participatory methodologies which identify different catalysts, including technology, innovation, business models, management, and organisation, regulation, sustainability policy, product design, and

culture The authors then show how these catalysts accelerate sustainability transitions As a unique value to the reader the book brings together public policy and private business perspectives to address the circular economy as a systemic change Its theoretical and practical perspectives are coupled with real world case studies from Finland Italy China India Nigeria and others to provide tangible insights on catalysing the circular economy across organisational hierarchical and disciplinary boundaries With its broad interdisciplinary and geographically diverse scope this handbook will be a valuable tool for researchers academics and policy makers in the fields of circular economy sustainability transitions environmental studies business and the social sciences more broadly The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license
