Vinci,2021-09-04 Do you want to know how Instagram really works and what mindset you must have to succeed in this
platform If you just starting reading through this guide and are thinking that your business isn t an eCommerce business and
so Instagram isn t the place for you think again Remember the key proposition that Instagram brings is visualization
Consider these examples 1 You re a real estate agent and want to highlight the newest mountain home that you have on the
market 2 You are a world class hospital that just released a new mother s ward with beautiful birthing and stay suites with a
spa like feel 3 You re a restaurant owner and want to highlight your savory and mouthwatering specials each week The above
examples are all situations where nothing is actually being transacted online but the business is building brand awareness
and drumming up interest so that the consumer will visit their website or pick up the phone to learn more The mysterious
Instagram algorithm While we ll never know exactly how Instagram has weighted the various data points that they put into
their algorithm we do know that Instagram s back end technology now focuses on relevancy serving up the posts that are
most likely to relate to certain users based on their activity on the site So every time a user clicks through a post or spends a
certain amount of time looking at a certain influencer Instagram is capturing that data in some way and building it into their
engine to ensure that posts that users won t care about are less likely to show up in their feed We do know however that
Instagram is looking at the following Timely content This is all about recency meaning if a user hasn t logged in for a while
they won t have to scroll through outdated and no longer relevant posts They ll be shown timely content that matters to them
Interest This is really the secret sauce as Instagram is paying attention and will serve content that it believes the user will be
interested in Relationships Instagram knows what photos users tag and where they comment So if a user has interacted in
some way with certain brands in the past they are far more likely to be served content from that brand or similar brands in
the future For marketers this is a great thing It means that as Instagram learns more about your brand your posts and
advertisements are more likely to get in front of your niche or target audience A few notes about Instagram Shopping With
the release of Instagram Shopping in late 2016 Instagram literally turned their platform into an online marketplace While it
is still a common practice to include website links to your business site and even to a product page now it is possible to allow
the customer to transact directly on the Instagram platform For businesses that want to enable the Shopping capability they
need to meet the following requirements You must have an Instagram business profile That business profile needs to be
