Day The Sun Rose Twice:

The Day the Sun Rose Twice Ferenc Morton Szasz, 1995-04-01 Winner of the Western History Association's Robert G. Athearn Award for outstanding book on the twentieth century American West Just before dawn on July 16, 1945, the world's first nuclear bomb was detonated at Trinity Site in an isolated stretch of the central New Mexico desert. It may have been the single most important event of the twentieth century. *The Day the Sun Rose Twice* tells the fascinating story of the events leading up to this first test explosion, the characters and roles of the people involved, and the aftermath of the bomb's successful demonstration. With J. Robert Oppenheimer, the father of the atomic bomb, at last getting his Hollywood close-up in Christopher Nolan's new blockbuster film *Oppenheimer*, readers can discover the background behind the world's first atomic blast in Ferenc Morton Szasz's award-winning history. Tightly focused, lucidly written, and thoroughly researched, according to the New York Times Book Review, the book provides a valuable introduction to how our nuclear dilemma began. *Day the Sun Rose Twice* Ferenc Morton Szasz, 1995-04-01 In this tightly focused, lucidly written, and thoroughly researched book, Ferenc Morton Szasz, a professor of history at the University of New Mexico, describes the events, personalities, and scientific processes that led to the detonation of the first atomic bomb in an isolated stretch of New Mexican desert. New York Times Book Review *The Day the Sun Rose Twice* Donald Thomas, 2013-07-14 When Karl Rainer Andor came to Berlin for the last time, it was sacrifice, not victory, that was uppermost in his mind. He intended to use the plutonium bomb he had elaborately planted to effect the reunification of Germany, but he didn't expect to survive. The allied powers are concerned as much with scoring off each other as with finding the bomb, or with seducing or frightening Andor into telling them where it is. And eventually they are faced with the impossible task of evacuating the historic capital of Germany. *The Day the Sun Rose Twice* Ferenc Morton Szasz, 1984 **The Death of a Harijan** Donald Serrell Thomas, Paul Thomas, 1984 *Downwind of the Atomic State* James C. Rice, 2025-04-2024 Outstanding Academic Title given by Choice Reviews How the scientific community overlooked, ignored, and denied the catastrophic fallout of decades of nuclear testing in the American West. In December of 1950, President Harry Truman gave authorization for the Atomic Energy Commission to conduct weapons tests and experiments on a section of a Nevada gunnery range. Over the next eleven years, more than a hundred detonations were conducted at the Nevada Test Site, and radioactive debris dispersed across the communities just downwind and through much of the country. In this important work, James C. Rice tells the hidden story of nuclear weapons testing and the negligence of the US government in protecting public health. *Downwind of the Atomic State* focuses on the key decisions and events shaping the Commission's mismanagement of radiological contamination in the region, specifically on how the risks of fallout were defined and redefined, or importantly, not defined at all, owing to organizational mistakes and the impetus to keep atomic testing going at all costs. Rice shows that although Atomic Energy Commission officials understood open air detonations injected radioactive debris into the atmosphere, they did not understand or seem to care that the radioactivity would

irrevocably contaminate these communities The history of the atomic Southwest should be a wake up call to everyone living in a world replete with large complex organizations managing risky technological systems The legacy of open air detonations in Nevada pushes us to ask about the kinds of risks we are unwittingly living under today What risks are we being exposed to by large organizations under the guise of security and science

The Republic of Nature Mark Fiege, 2012-03-20 In the dramatic narratives that comprise The Republic of Nature Mark Fiege reframes the canonical account of American history based on the simple but radical premise that nothing in the nation's past can be considered apart from the natural circumstances in which it occurred Revisiting historical icons so familiar that schoolchildren learn to take them for granted he makes surprising connections that enable readers to see old stories in a new light Among the historical moments revisited here a revolutionary nation arises from its environment and struggles to reconcile the diversity of its people with the claim that nature is the source of liberty Abraham Lincoln an unlettered citizen from the countryside steers the Union through a moment of extreme peril guided by his clear eyed vision of nature's capacity for improvement In Topeka Kansas transformations of land and life prompt a lawsuit that culminates in the momentous civil rights case of Brown v Board of Education By focusing on materials and processes intrinsic to all things and by highlighting the nature of the United States Fiege recovers the forgotten and overlooked ground on which so much history has unfolded In these pages the nation's birth and development pain and sorrow ideals and enduring promise come to life as never before making a once familiar past seem new The Republic of Nature points to a startlingly different version of history that calls on readers to reconnect with fundamental forces that shaped the American experience For more information visit the author's website <http://republicofnature.com>

Inventing Los Alamos Jon Hunner, 2014-08-04 A social history of New Mexico's Atomic City Los Alamos New Mexico birthplace of the Atomic Age is the community that revolutionized modern weaponry and science An instant city created in 1943 Los Alamos quickly grew to accommodate six thousand people scientists and experts who came to work in the top secret laboratories others drawn by jobs in support industries and the families How these people as a community faced both the fevered rush to create an atomic bomb and the intensity of the subsequent cold war era is the focus of Jon Hunner's fascinating narrative history Much has been written about scientific developments at Los Alamos but until this book little has been said about the community that fostered them Using government records and the personal accounts of early residents Inventing Los Alamos traces the evolution of the town during its first fifteen years as home to a national laboratory and documents the town's creation the lives of the families who lived there and the impact of this small community on the Atomic Age

Quest for the Golden Circle Arthur R. Gómez, 2000 Until World War II the Four Corners Region where New Mexico Colorado Utah and Arizona meet was a collection of isolated rural towns In the postwar baby boom era however small communities like Farmington New Mexico became bustling municipalities with rapidly expanding economies In Quest for the Golden Circle Arthur Gomez traces the development of the Four Corners two industries mining

and tourism to discover how each contributed to the economic and urban transformation of this region during the 1950s and 1960s Focusing on four cities Durango Colorado Moab Utah Flagstaff Arizona and Farmington New Mexico Gomez chronicles how these towns played key roles in the West's dramatic postwar expansion Cities such as Denver Albuquerque Phoenix Tucson El Paso and Salt Lake City all grew through use of the abundant petroleum uranium natural gas timber and other natural resources extracted from the Four Corners region But the energy boom in these towns was not to last With the arrival of foreign oil bringing economic growth to a halt in the early 1970s town leaders turned again to the land to stimulate their economy This time the resource was a seemingly inexhaustible one tourism Gomez examines how business minded citizens marketed the area's scenic wonders and established the entire region as a tourist destination Their efforts were further assisted by the selection of stunning federal lands Mesa Verde Grand Canyon and Arches National Parks as treasures protected and promoted by the National Park Service Both mining and tourism however were beset by complex new problems and issues Extensive highways for instance were planned to bisect a Navajo reservation As Gomez illustrates the growing cities in the Four Corners region felt tremendous competing pressures between outside business powers and local needs as their extractive economy boomed and busted and as they then struggled to attract tourism dollars In addition he highlights the prominent roles played by federal agencies like the Atomic Energy Commission and the National Park Service in shaping regional destiny An outstanding analysis of the complexities of postwar development *Quest for the Golden Circle* successfully illuminates the history of one region within the larger story of the modern American West The Workbook, 1985 Belgravia, a London magazine, conducted by M.E. Braddon Belgravia, 1884 Belgravia, 1884 **The Illustrated Bible Treasury** William Wright, 1896 *No End Save Victory* Various, 2002-02-22 Robert Cowley and the editors of *Military History Quarterly* present a fascinating anthology of World War II essays from some of the world's most eminent historians The Atomic Bomb Hans G.
