Daylighting Natural Light In Architecture:

Daylighting Derek Phillips, 2012-05-23 Daylighting offers a general theory and introduction to the use of natural light in architecture The fourth of Derek Phillip s lighting books draws on his experience to illustrate how best to bring natural light into building design As sustainability becomes a core principal for designers daylighting comes to the fore as an alternative to artificial energy consuming light Here Phillips makes a rational argument for considering daylight first outlining the arguments in favour of a daylight approach and goes on to show through a series of beautifully illustrated case studies how architects have created buildings in which natural light has been shown to play a major strategic role in the development of the design of a building

Illuminating Michelle Corrodi, Klaus Spechtenhauser, 2014-03-12 The image of open working and living spaces flooded with light has more than any other become fixed in our minds as a symbol of modernity and the spirit of the times While the workplace has always been the focus of ergonomic studies and optimization with respect to a good provision of daylight large glass surfaces have now become the order of the day for living spaces as well But does this automatically make for better illumination Taking this question as its starting point the publication *Illuminating* thematizes central aspects of light planning including the connection between the provision of daylight and architectural design building orientation the nature of the facade the ground plan comfort and the proportions and atmosphere of rooms In the process general characteristics and fundamental principles as well as subtle facets of an intelligent treatment of daylight are discussed and critically examined within an expanded architecture and culture historical context

The Architecture of Light Mary Ann Steane, 2012-11-12 Reviewing the use of natural light by architects in the era of electricity this book aims to show that natural light not only remains a potential source of order in architecture but that natural lighting strategies impose a usefully creative discipline on design Considering an approach to environmental context that sees light as a critical aspect of place this book explores current attitudes to natural light by offering a series of in depth studies of recent projects and the particular lighting issues they have addressed It gives a more nuanced appraisal of these lighting strategies by setting them within their broader topographic climatic and cultural contexts

Illuminating Michelle Corrodi, Klaus Spechtenhauser, 2014-03 With an analysis of current and historical examples this title presents the fundamental principles of using daylight in architecture

Natural Light Hestia Thornbrook, 2025-01-04 Natural Light offers a comprehensive exploration of daylight s crucial role in architectural design and human well being addressing the growing disconnect between modern indoor living and our biological need for natural illumination The book uniquely bridges scientific understanding with practical architectural solutions examining how natural light impacts both human health and sustainable building design Through a careful blend of historical context and contemporary research it demonstrates why proper daylighting is not merely an aesthetic choice but a fundamental aspect of human centric architecture The work progresses logically through three main sections beginning with the scientific principles of natural light and its biological effects moving

to architectural strategies illustrated through real world case studies and concluding with practical implementation methods for both new construction and renovations Drawing from peer reviewed research in chronobiology and architectural studies the book presents compelling evidence for the importance of natural light in building design while offering specific solutions for common challenges such as light redirecting systems and smart glazing technologies What sets this resource apart is its accessible approach to complex technical concepts making it valuable for both professionals and informed homeowners The book addresses specific challenges across different climate zones and urban contexts providing detailed guidelines for window placement glazing selection and interior layout optimization By connecting architecture with environmental psychology and energy conservation it offers a holistic perspective on creating naturally lit environments that enhance both building performance and occupant well being

Natural Light in Medieval Churches, 2022-12-12 Inside Christian churches natural light has long been harnessed to underscore theological symbolic and ideological statements In this volume twenty four international scholars with various specialties explore how the study of sunlight can reveal essential aspects of the design decoration and function of medieval sacred spaces Themes covered include the interaction between patrons advisors architects and artists as well as local negotiations among competing traditions that yielded new visual and spatial constructs for which natural light served as a defining and unifying factor The study of natural light in medieval churches reveals cultural relations knowledge transfer patterns processes of translation and adaptation as well as experiential aspects of sacred spaces in the Middle Ages Contributors are Anna Adashinskaya Jelena Bogdanovi Debanjana Chatterjee Ljiljana av Aleksandar u akovi Du an Danilovi Magdalena Dragovi Natalia Figueiras Pimentel Leslie Forehand Jacob Gasper Vera Henkelmann Gabriel Dinu Herea Vladimir Ivanovici Charles Kerton Jorge L pez Quiroga Anastasija Martinenko Andrea Mattiello Rub n G Mendoza Dimitris Minasidis Maria Paschali Marko Peji Iakovos Potamianos Maria Shevelkina Alice Isabella Sullivan Travis Yeager and Olga Yunak

Daylighting, Architecture and Health Mohamed Boubekri, 2008-09-10 Daylighting Architecture and Health examines the relationship between natural light in buildings and human health considering both psychological and physiological issues and bringing together a range of research in the field As we are becoming increasingly conscious of global warming and pushing towards energy efficiency in buildings the book examines the question of daylighting from the perspective of the health of building occupants It gathers and reviews all the latest and pertinent medical and architectural research related to natural light or lack thereof and its effect on people Documents medical research findings which establish a link between light quality and health Considers design strategies for increasing daylight in buildings Develops understanding and awareness of the importance of natural light in buildings Daylighting Architecture and Health Building Design Strategies is a timely and essential text for professional architects and all others concerned with the effects of daylighting on health architecture and building design

The Architecture of Natural Light Henry Plummer, 2012 This new paperback is the first publication to consider the many effects of natural illumination in

contemporary buildings This comprehensive and thoughtful survey begins with a brief introduction to the history of architecture seen through the advances and experimentation put forward by architects over the centuries

Natural Light in Architecture Ann Tracy O'Meagher, 1989

Passive Solar Architecture David Bainbridge, Ken Haggard, 2011-08-18 New buildings can be designed to be solar oriented naturally heated and cooled naturally lit and ventilated and made with renewable sustainable materials no matter the location or climate In this comprehensive overview of passive solar design two of America's solar pioneers give homeowners architects designers and builders the keys to successfully harnessing the sun and maximizing climate resources for heating cooling ventilation and daylighting Bainbridge and Haggard draw upon examples from their own experiences as well as those of others of more than three decades to offer both overarching principles as well as the details and formulas needed to successfully design a more comfortable healthy and secure place in which to live laugh dance and be comfortable Even if the power goes off Passive Solar Architecture also discusses greener and more sustainable building materials and how to use them and explores the historical roots of green design that have made possible buildings that produce more energy and other resources than they use

Heating, Cooling, Lighting Norbert Lechner, 2014-10-13 Sustainable environmental control through building design Heating Cooling and Lighting is the industry standard text on environmental control systems with the emphasis on sustainable design By detailing the many factors that contribute to the comfort in a building this book helps architects minimize mechanical systems and energy usage over the life of the building by siting building design and landscaping to maximize natural heating cooling and lighting This new fourth edition includes new information on integrated design strategies and designing for the Tropics Resources include helpful case studies checklists diagrams and a companion website featuring additional cases an image bank and instructor materials Designing buildings that require less energy to heat cool and light means allowing the natural energy of the sun and wind to reduce the burden on the mechanical and electrical systems Basic design decisions regarding size orientation and form have a great impact on the sustainability cost and comfort of a building Heating Cooling and Lighting provides detailed guidance for each phase of a design project Readers will Understand the concept of sustainability as applied to energy sources Review the basic principles of thermal comfort and the critical role of climate Learn the fundamentals of solar responsive design including active and passive solar systems as well as photovoltaics Discover how siting architectural design and landscaping can reduce the requirements for mechanical and electrical systems In sustainable design mechanical and electrical systems should be used to only accomplish what the architect could not by the design of the building itself With this in mind designers require a comprehensive understanding of both the properties of energy and the human factors involved in thermal comfort Heating Cooling and Lighting is the complete industry leading resource for designers interested in sustainable environmental control

Sacred Buildings Rudolf Stegers, 2008-05-16 In a systematic section this volume introduces the design technical and planning fundamentals of building churches synagogues and mosques In its project section it also presents about seventy

realized structures from the last three decades

Dynamic Daylighting Architecture Helmut Köster, 2004 When planning buildings in which people are to work and live the efficient use of natural daylight and solar energy is increasingly important The challenge is to compensate the different lighting requirements in winter and summer Integrated daylight deflection systems buildings utilize and store solar energy to save artificial lighting air conditioning and heating costs Extensively researched and impressively illustrated with a large number of computer simulations and photographs of built examples this volume is more than an introduction to the basic principles functions designs and calculation methods of advanced light guidance technology for architects lighting designers building and climate engineers In particular it provides detailed documentation of the new Retro Technology systems explaining the role they can and do play in integrated facade and building design and planning processes distributed by Syndetic Solutions Inc

Lighting Design Ulrike Brandt, 2012-12-17 A concise systematic introduction to natural and artificial lighting design More than any building material light produces spatial effects generates moods and stages architectural designs In well lit spaces we feel good and we are capable and effective light promotes health Moreover especially in office buildings the combination of a sensible natural lighting design with a corresponding approach to artificial lighting is a decisive factor in energy conservation Assembled by experienced authors and experts from the worlds of practice and teaching this new volume in the series Detail Practice provides an introduction to the most important aspects of natural and artificial lighting design In addition to straightforward planning rules such as ground plan design building orientation and the structuring of facades it also introduces and explains current natural and artificial lighting systems with the help of example projects

Site Layout Planning for Daylight and Sunlight P. J. Littlefair, 2011 This highly regarded BRE guide gives advice on site layout planning to achieve good sunlighting and daylighting both within buildings and in the open spaces between them New material covers dense urban areas trees and hedges

Daylighting in Architecture Nick V. Baker, A. Fanchiotti, K. Steemers, 2013-11-05 Typically one third of the energy used in many buildings may be consumed by electric lighting Good daylighting design can reduce electricity consumption for lighting and improve standards of visual comfort health and amenity for the occupants As the only comprehensive text on the subject written in the last decade the book will be welcomed by all architects and building services engineers interested in good daylighting design The book is based on the work of 25 experts from all parts of Europe who have collected evaluated and developed the material under the auspices of the European Commission's Solar Energy and Energy Conservation R D Programmes

Architecture, 1909 Architecture and Light Fabio Capanni, 2017 Light is the soul of space a breath that passes through it giving it life Chasing the shadow unabated in a ritual that makes visible the passage of time The architecture is first of all the implementation of this ritual that ignites the dialectic between fixity of

space and dynamic action of light between the finiteness of the measures and incommensurability natural element between concreteness of matter and abstraction of the vacuum This book provides system certain basic principles that govern the relationship between architectural space and natural light to put them at the center of the architect s work 33 bicoloured illustrations **The Architect's Newspaper** ,2006
