De Gaulle En Son Siecle Tome 3 Moderniser La France:

Germany, France and Postwar Democratic Capitalism François Godard, 2024-05-23 This book concentrates on the political economies of Germany and France in the period spanning between the end of the Second World War and the 1970s with a subsequent consideration of Italy and Britain as shadow cases European postwar accounts have never reconciled the thwarting of widespread aspirations to socialism and the twin feat of equalitarian growth and institutional stability This success is precisely due to achieving the reconciliation of democracy and economic management the yearning for collective control over social and material outcomes that was tragically aborted in the interwar period and fed 1945 expectations Germany in 1948-49 and France in 1958 carried radical institutional and policy reforms with much more in common than previously realised Under the recast republics social groups were steered towards support for modernisation by the state not through a mythical settlement Consensus was built for trade and low inflation as vectors for higher productivity State capacity was lifted by leadership in ideas executive branch accountability to voters and technocratic agencies British and Italian underperformances reveal the countries uneasiness with the compact Once understood the convergence of productivism and democracy in the European regulatory state provides a new narrative especially relevant today of experts taming populists The Open Access version of this book available at www.taylorfrancis.com has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license De Gaulle en son siècle: Moderniser la France Institut Charles de Gaulle, 1992 **From the Active to the Enabling State** E. Page, V.

Wright, 2006-10-24 This book surveys the changing role of senior civil servants in Western Europe and explores whether they have kept their central role in government decision making Looking at these issues in comparative perspective the contributors provide an insight into the causes and consequences of the changing role of officials **Reconsidering**

Sputnik Roger D. Lanius, John M. Logsdon, Robert W. Smith, 2013-05-13 This book explores Russia's stunning success of ushering in the space age by launching Sputnik and beating the United States into space It also examines the formation of NASA the race for human exploration of the moon the reality of global satellite communications and a new generation of scientific spacecraft that began exploring the universe An introductory essay by Pulitzer Prize winner Walter A. McDougall sets the context for Sputnik and its significance at the end of the twentieth century **European Union Research Policy**

Veera Mitzner, 2020-06-01 This book describes the emergence of research policy as a key competence of the European Union EU It shows how the European Community EC the predecessor of the EU which initially had very limited legal competence in the field progressively developed a solid policy framework presenting science and research as indispensable tools for European economic competitiveness and growth In the late 20th century Western Europe hungry for growth concerned about the American technological lead and keen to compete in the increasingly open international markets the argument for a joint European effort in science and technology seemed plausible However the EC was building its new functions in an already

crowded field of European research collaboration and in a shifting political context marked by austerity national rivalries new societal and environmental challenges and emerging ambivalence about science This book conveys the contested history of one of the EU s most successful policies It is a story of struggle and frustration but also of a great institutional and intellectual continuity The ideational edifice for the EC EU research policy that was put in place during the 1960s and 1970s years proved remarkably robust Its durability enabled the rapid takeoff of the European Commission s initiatives in the more favorable political atmosphere of the early 1980s and the subsequent expansion of the EU research funding instruments and programs that permanently transformed the European research landscape

Constructing the Gaullist Consensus Tamara Keating, 2004 I am on a theater stage and I pretend to believe in it I am pretending that France is a great country It is a perpetual illusion Charles de Gaulle These words raised the relevant questions for this study Is the much lauded cross party consensus on France s great power status a myth intended to promote internal cohesion and the French identity How has this affected the Franco American security relationship Analyzing the National Assembly debates on the country s military program laws the author applies constructivist concepts to answer these questions Tamara Keating studied international relations at the universities of Passau Paris and Hamburg and is now working at the European Parliament
