De Havilland Mosquito Edward Shacklady, 2005-10. The de Havilland Mosquito was the non-conformist among aircraft of World War Two as its ingenious wooden construction was revolutionary. Like most of the world's greatest combat aircraft, the Mosquito owed nothing to official sponsorship and its appearance relied totally on the dogged perseverance of its designers, Geoffrey de Havilland and C. C. Walker. Conceived originally in 1938 as a fast, highly maneuverable yet unarmed day bomber, the Mosquito did not get official recognition until March 1940 when an order for fifty was given by the British Air Ministry. It soon proved to be an outstanding aircraft and quickly established a reputation for excellent flying qualities, an unequalled talent for destroying pinpoint targets, and for having by a large margin the lowest loss rate of any aircraft in service with Bomber Command. Its versatility made it unique, and the Mosquito was successful in such varied roles as a high and low level day and night fighter, long range day and night fighter, fighter bomber, minelayer, pathfinder, rocket armed ground attack, and high and low level photo reconnaissance aircraft.

De Havilland Mosquito, Vol. 2 Ron Mackay, 2021-08-28. This second of two volumes on de Havilland's Wooden Wonder covers the World War II bomber and photoreconnaissance variants of the deadly Mosquito. Along with its night fighter and fighter bomber variants, Mosquito bomber squadrons attacked the enemy around the clock. Pinpoint assaults on specialist targets were another aspect of Mosquito operations, whose destructive effect on the Axis was constantly felt. Also featured in this volume is the Mosquito's operational service between 1942 and 1945 within the ranks of the RAF, Commonwealth air forces, and US Army Air Force, as well as postwar use.
