Dead Zone Uk Edition:

Dead Zone Philip Lymbery, 2017-03-09 An honest compelling and important account and a critical plea for a fusion of farming food and nature to provide global ecological security CHRIS PACKHAM Why are so many animals facing extinction Climate change and poaching are not the only culprits The impact of consumer demand for cheap meat is equally devastating and it is vital that we confront this problem if we are to stand a chance of reducing its effect on the world around us We are falsely led to believe that squeezing animals into factory farms and cultivating crops in vast chemical soaked prairies is a necessary evil an efficient means of providing for an ever expanding global population while leaving land free for wildlife Our planet's resources are reaching breaking point awareness is slowly building that the wellbeing of society depends on a thriving natural world From the author of the internationally acclaimed Farmageddon **Dead Zone** takes us on an eye opening journey across the globe focussing on a dozen iconic species from elephants to bumblebees to penguins and looking at the role that industrial farming is playing in their plight
