*Minority Rules* David Lublin, 2014 When we think of minorities linguistic ethnic religious regional or racial in world politics conflict is often the first thing that comes to mind Indeed discord and tension are the depressing norms in many states across the globe Iraq the former Yugoslavia Sudan Israel Sri Lanka Burma Rwanda and many more But as David Lublin points out in this magisterial survey of minority based political groups across the globe such parties typically function fairly well within larger polities In *Minority Rules* he eschews the usual approach of shining attention on conflict and instead looks at the representation of minority groups in largely peaceful and democratic countries throughout the world from the tiniest nations in Polynesia to great powers like Russia Specifically he examines factors behind the electoral success of ethnic and regional parties and alternatively their failure to ever coalesce to explain how peaceful democracies manage relations between different groups Contrary to theories that emphasize sources of minority discontent that exacerbate ethnic cleavages for instance disputes over control of natural resource wealth *Minority Rules* demonstrates that electoral rules play a dominant role in explaining not just why ethnic and regional parties perform poorly or well but why one potential ethnic cleavage emerges instead of another This is important because the emergence of ethnic regional parties along with the failure to incorporate them meaningfully into political systems has long been associated with ethnic conflict Therefore Lublin's findings which derive from an unprecedentedly rich empirical foundation have important implications not only for reaching successful settlements to such conflicts but also for preventing violent majority minority conflicts from ever occurring in the first place
