 subject Business economics Business Management Corporate Governance grade 1.6 language English abstract In this paper
 the phenomenon of digital nomadism in permanent employment is presented In general digital nomads are characterized by
 their independence of location their employment in the digital space and common values Most of them are freelancers and

 framework condition can mean for example the adaptation of processes and leadership There are also differences between
 completely remote companies and only partially remote companies which can lead to a split company structure In this
 context the similarities and differences between traditional telework and digital nomadism in permanent employment were
 also examined These are similar for example regarding the technical prerequisites that should be created in companies and
 the changed communication In addition there are challenges and opportunities that arise from the travel component and the

nature of digital nomadism such as negatively impaired processes due to time differences or certain characteristics and experiences that digital nomads possess or experience that can be used positively in a professional context Thus this work not only serves a scientific purpose but also provides a practical framework for employing digital nomads in traditional
