is no one solution to stop the spreading of pandemic diseases and the integration of several tools and tactics are needed. Many successful applications of AI, ML, IoT and drone technologies already exist including systems that analyze past data to predict and conclude some useful information for controlling the spread of COVID-19 infections using minimum resources. The AI and ML approach can be helpful to design different models to give a predictive solution for mitigating infection and preventing larger outbreaks. This book examines the use of artificial intelligence, AI, machine learning, ML, Internet of Things, IoT and drone technologies as a helpful predictive solution for controlling infection of COVID-19. Covers recent research related to the COVID-19 pandemic and includes the analysis, implementation, usage and proposed ideas and models with architecture to handle a pandemic outbreak. Examines the performance, implementation, architecture and techniques of different analytical and statistical models related to COVID-19. Includes different case studies on COVID-19.

**Art, Media Design, and Postproduction** Eduardo Navas, 2025-05-12. A concise guide to the creative application of appropriation and remix that offers a set of open-ended guidelines for art and design studio-based projects. This book explores creativity with emerging technology including artificial intelligence. This fully revised and expanded second edition engages with the ongoing recycling and repurposing of content and form and the new directions the emerging form of metacreativity is taking. Art and design as artists continue to expand their creative methodologies. Exploration of metacreativity is new to this edition with a focus on remix principles, the implementation of data analysis and the delegation of parts of the creative process to automated algorithms and artificial intelligence. Each chapter includes an introduction, goals for guidelines of a studio-based project with an explanation of relevant history as well as examples and case studies. Each set of guidelines is open-ended, enabling the reader to repurpose the instructional material according to their own methodologies and choice of medium. Navas also provides historical and theoretical context to encourage critical reflection. The second edition remains the first book of guidelines to take into account the historical, theoretical and practical context of remix as an interdisciplinary act. This is an essential read for those interested in remix studies and appropriation in art, design and media.
