Mediating Plureality Morten Bay, 2025-03-24 In this book Morten Bay provocatively questions whether or not truth in media is lost and furthermore whether humans can perceive objective reality or as many neuroscientists and philosophers now believe we all perceive different realities constructed through predictive processing As affective polarization continues to render American democracy increasingly dysfunctional a situation largely inflamed by media Bay calls for a cultural shift in which these two conditions are reconciled Drawing on political philosophy this book presents an ethics that holds up

responsible media conduct as a democratic duty of all media users This shift in ethical frameworks carries with it different implications for a variety of audiences including individuals media platforms and corporations media practitioners and journalists media studies scholars and society more broadly Each stakeholder involved will need to reconsider their approach to media and reality individuals must accept that everyone s perceptions of reality are different platforms and corporations must cease irresponsible practices that dissociate realities and stoke division practitioners and journalists must develop more nuanced epistemologies beyond The Truth and scholars must redefine media by foregrounding epistemology pluralism and physicality in media theory Collectively Bay argues we must come to a new understanding of reality as a plurality of realities a plureality Advances in Computer Graphics Nadia Magnenat-Thalmann, Jinman Kim, Bin Sheng, Zhigang Deng, Daniel Thalmann, Ping Li, 2025-03-01 The three volume set LNCS 15338 15339 and 15340 constitutes the refereed proceedings from the 41st Computer Graphics International Conference CGI 2024 held during July 1 5 2024 in Geneva Switzerland The 84 full papers presented in these proceedings were carefully reviewed and selected from 211 submissions The papers are organized in the following topical sections Part I Colors painting and layout detection and recognition image analysis and processing image restoration and enhancement and visual analytics and modeling Part II Graphics and VR AR reconstruction rendering and animation and theoretical analysis Part III Image analysis and visualization image attention and perception medical imaging and robotics synthesis and generation and empowering novel geometric algebra for graphics engineering workshop
