Practical Ai Logo Maker For Beginners For Men:

Artificial Intelligence in Economics and Managment Phillip Ein-Dor,2012-12-06 In the past decades several researchers have developed statistical models for the prediction of corporate bankruptcy e g Altman 1968 and Bilderbeek 1983 A model for predicting corporate bankruptcy aims to describe the relation between bankruptcy and a number of explanatory financial ratios These ratios can be calculated from the information contained in a company s annual report The is to obtain a method for timely prediction of bankruptcy a so ultimate purpose called early warning system More recently this subject has attracted the attention of researchers in the area of machine learning e g Shaw and Gentry 1990 Fletcher and Goss 1993 and Tam and Kiang 1992 This research is usually directed at the comparison of machine learning methods such as induction of classification trees and neural networks with the standard statistical methods of linear discriminant analysis and logistic regression In earlier research Feelders et al 1994 performed a similar comparative analysis The methods used were linear discriminant analysis decision trees and neural networks We used a data set which contained 139 annual reports of Dutch industrial and trading companies The experiments showed that the estimated prediction error of both the decision tree and neural network were below the estimated error of the linear discriminant Thus it seems that we can gain by replacing the traditionally used linear discriminant by a more flexible classification method to predict corporate bankruptcy The data set used in these experiments was very small however

Design, Visual Communication and Branding Daniel Raposo,2022-02-17 This book highlights how digital communication has brought about changes in branding namely in design the media communication languages the relationship with audiences experience design behaviour culture and brand management mechanisms On the other hand as it argues artificial intelligence has opened the door to other ways of dealing with big data and communicating with mass audiences through the customization of messages or a one to one logic Overall the book shows that the intersections between digital communication and artificial intelligence point towards a new reality in brand communication which includes computer vision pattern recognition and changes in the design business and in the way communication design and branding are done
