Critical AI in K-12 Classrooms Stephanie Smith Budhai, Marie K. Heath, 2025-09-08 A practical guide for teachers and students navigating the complicated intersection of artificial intelligence education and justice Artificial intelligence is rapidly integrating into today's classrooms but unlike other new technologies AI has the potential to harm making it difficult to take advantage of its benefits In *Critical AI in K 12 Classrooms* Stephanie Smith Budhai and Marie K Heath draw attention to the biases embedded within AI algorithms such as those powering OpenAI's ChatGPT and DALL E to guide students and teachers in developing strategies to best incorporate AI or not into equitable learning AI's reliance on existing data and knowledge systems means Black queer those with disabilities and other marginalized students are at greater risk of being harmed by built-in limitations and bias Budhai and Heath show how to circumvent if not actively resist such harms as machine learning NLPs LLMs and GenAI enter the classroom with practical examples rooted in culturally sustaining abolitionist and fugitive pedagogies across disciplines Their practical guide creatively answers the concerns of educators committed to forward thinking yet fair instruction and the needs of students eager to use AI for just ends *Critical AI in K 12 Classrooms* meets the challenges of a key STEM technology with an eye toward cultivating a more just world Balancing responsible learning with the joy of discovery Budhai and Heath build a framework for AI instruction that all educators can confidently use

The Psychology of Fear in Organizations Sheila Keegan, 2015-02-03 In the context of global economic recession fear has become institutionalized in many organizations both in the private and public sectors Board directors are under pressure from shareholders senior executives are attempting to maintain sales in a nervous market and many people are concerned about job security and maintaining their living standards *The Psychology of Fear in Organizations* shows how fear manifests itself in large organizations how it impacts on the workforce and how by reducing our willingness to take risks and to innovate it can inhibit economic growth and innovation at both an individual and corporate level *The Psychology of Fear in Organizations* examines the psychological barriers to innovation and presents initiatives to loosen the paralysis caused by the economic downturn It presents psychological theory in an accessible way to provide a better understanding of the needs and fears of people and how they can be supported to improve productivity and innovation Online supporting resources include lecture slides on how to harness fear to fuel innovation

The Digital Silk Road David Gordon, Meia Nouwens, 2022-11-29 Concerns about China's ambitions to return to global centre stage as a great power have recently begun to focus on the Digital Silk Road DSR an umbrella term for various activities commercial and diplomatic of interest to the Chinese government in the cyber realm Part of or a spin off from the 2013 Belt and Road Initiative by 2020 the DSR had become a focal point of China's foreign policy But the DSR remains ill defined and poorly understood At the heart of such concerns is not that Chinese technology companies are becoming globally competitive but rather that Beijing could use them to rewire the global digital architecture from physical cables to code Dominance by Chinese technology could shift global

norms from a free cyber commons to competing systems of cyber sovereignty or cyber freedom This Adelphi book brings together eight experts to examine the development of the DSR explore its impact on economics security and governance in recipient countries and assess the broader impact on patterns of economic and technological dependence on the emerging rules and norms of tech globalisation and on global geopolitics and great power relations Beijing has grasped the opportunity to leverage the entrepreneurial strengths of its private tech sector to gain prominence in the world s digital ecosystem But the more interventionist Beijing becomes the more Chinese firms will be seen as instruments of the state and the greater the pushback against Chinese technology and the DSR may be To achieve great power status and global centrality Beijing might ultimately need to change tack How it innovates in further rolling out Chinese tech across the world and what the DSR will then look like will have far reaching impacts on global economics politics and security
