Timesaving AI Tools for Teachers Guillermo Antón-Pardo, 2023-09-28

ARTIFICIAL INTELLIGENCE is already here and is set to revolutionize education and society Start learning to use AI tools that will help you save time in your teaching tasks while you join the forefront of the changes brought by this technology and in the process improve the way you teach The first goal of this guide like most of my books is to showcase AI tools and applications that allow teachers to complete tasks in less time Therefore it does not seek to innovate education through the use of AI nor explain how to use it in class with students However many of the tools mentioned can be adapted for classroom

use with students and undoubtedly the time saved by using AI will bring us greater personal well being which will positively influence our teaching The second goal of this book is to serve as a guide that organizes the immense amount of AI tools that have emerged in a short time and guide the reader in their exploration It does not mean to be an in depth tutorial on any of the tools which would be unmanageable Instead it aims to provide an overview on their uses and applications The book explores and evaluates many of the AI tools applicable to teaching work grouped into 25 categories including ["Free AI Tools for Teachers 2025](#) Deepak D,2025-09-18 Teaching has always been about balance balancing lessons grading parent communication and the unique needs of every student However in 2025 maintaining that balance is more challenging than ever Teachers are stretched thin and the demands of modern classrooms can feel overwhelming That s where artificial intelligence AI comes in But let me be clear this book isn t about replacing teachers with robots or adding more technology headaches to your plate It s about introducing you to free easy to use AI tools that can reduce your workload spark creativity and free up time for what matters connecting with your students When I started researching AI in education I was amazed by how many powerful tools were available at no cost Teachers were using them to draft lesson plans in minutes generate practice quizzes provide personalised feedback and even keep their classrooms more organised The more I explored the clearer it became every teacher deserves access to these tools and most importantly guidance on how to use them effectively
