

7 Quick Ways

Teachers Can Save Time with ChatGPT

01

Email Reminders

Try using the prompt "Write an email to remind families about our field trip to the museum next week."

02

Rewrite a Sentence

Worried that part of a task or email doesn't sound quite right? Use the prompt, "Rewrite this sentence so it is clearer."

03

Simplify Your Writing

Try the prompt, "Simplify this, so it is less confusing." Then paste the paragraph you wrote.

04

Explain Something

Use a prompt like "Explain the process of..." It can save time by giving you a starting point instead of writing entirely from scratch.

05

Titles & Descriptions

Do you make videos for your students? Try having ChatGPT write the video titles and descriptions for you.

06

Keyboard Shortcuts

Try asking ChatGPT to help you find shortcuts. Ask, "Make a list of keyboard shortcuts for Google Calendar."

07

Email Revisions

Write an email, and paste the text into ChatGPT with the prompt "Rewrite this email so it is friendly, clear, and professional."

The Big Red Book of

Advanced Technology Harry Katzan Jr.,2025-11-10 This book is a collection of four books The Little Red Book of Artificial Intelligence The Little Red Book of Service Science The Little Red Book of Managing Uncertainty and The Little Red Book of Cybersecurity Cloud Computing and Systems Ontology The first book contains a gentle introduction to Artificial Intelligence generally referred to as AI It is not a textbook and not a reference book It is intended for persons who desire to know what AI is all about but do know very much about the subject to start with It also covers about what AI is already but it is more than that It does answers the question Can a machine think Even though most people are quite tired of that question In fact people are now more interested in what is going on This book is special because the interests of the reader are taken into consideration It is not for Artificial Intelligence experts and it is not an ego trip to enhance the author s reputation This book is also about service a concept that is part of our daily lives Almost everything we do is related to service Even if we don t recognize it Doctors lawyers and truck drivers all perform a service that is obvious There is a real science to service You can find out about it by reading this book A good thing about this book is that you can open the book and start reading at any point and be able to clearly understand the subject matter If you aren t one already people will think you are a genius Believe

me There is an introductory section of the book with three flavors Cybersecurity Cloud Computing and Systems Ontology all related to computers artificial intelligence and managing uncertainty It is not intended for specialists It is too simple for them As unusual as that sounds there is a very good reason for its existence There are existing books on the subjects that are very good but are very difficult to read It s straightforward The concepts are complicated and some require complex math Cybersecurity is about maintaining a secure envirnment for just about everything we do with computers Cloud computing is intendedd to share the computer space beterrn organization and people Ontology is then study what exists It is philosophical Ontology is about the existence of things that exist and how to describe and analyze them In the world of philosophy there are two basic concepts there are synthetic things and analytic things Synthetic things are based on ideas Analytic things are about things that actually exist That s a bit simple but it is all we need at the moment How is it that we can know about things that exist We have to be able to describe them It s that simple This last book covers the subject of managing uncertainty It is both a text book and a reference book on the application of Dempster Shafer theory that has commanded a lot of attention in the business community There is not much written on using the techniques and that is unfortunate The methods are extremely powerful and management and technical persons should know of their existence A math background is not required to read and use the methods even though some math descriptive techniques are necessary for efficiency of expression Actually the reader only needs to find out what can be done without having to actually do it Finally have a pleasurable reading You deserve it
