

7 Quick Ways

Teachers Can Save Time with ChatGPT

01

Email Reminders

Try using the prompt "Write an email to remind families about our field trip to the museum next week."

02

Rewrite a Sentence

Worried that part of a task or email doesn't sound quite right? Use the prompt, "Rewrite this sentence so it is clearer."

03

Simplify Your Writing

Try the prompt, "Simplify this, so it is less confusing." Then paste the paragraph you wrote.

04

Explain Something

Use a prompt like "Explain the process of..." It can save time by giving you a starting point instead of writing entirely from scratch.

05

Titles & Descriptions

Do you make videos for your students? Try having ChatGPT write the video titles and descriptions for you.

06

Keyboard Shortcuts

Try asking ChatGPT to help you find shortcuts. Ask, "Make a list of keyboard shortcuts for Google Calendar."

07

Email Revisions

Write an email, and paste the text into ChatGPT with the prompt "Rewrite this email so it is friendly, clear, and professional."

The Big Red Book of Advanced Technology Harry Katzan Jr., 2025-11-10 This book is a collection of four books: *The Little Red Book of Artificial Intelligence*, *The Little Red Book of Service Science*, *The Little Red Book of Managing Uncertainty*, and *The Little Red Book of Cybersecurity*. Cloud Computing and Systems Ontology

The first book contains a gentle introduction to Artificial Intelligence generally referred to as AI. It is not a textbook and not a reference book. It is intended for persons who desire to know what AI is all about but do not know very much about the subject to start with. It also covers about what AI is already but it is more than that. It does answer the question: Can a machine think? Even though most people are quite tired of that question. In fact, people are now more interested in what is going on. This book is special because the interests of the reader are taken into consideration. It is not for Artificial Intelligence experts and it is not an ego trip to enhance the author's reputation. This book is also about service, a concept that is part of our daily lives. Almost everything we do is related to service. Even if we don't recognize it. Doctors, lawyers, and truck drivers all perform a service that is obvious. There is a real science to service. You can find out about it by reading this book. A good thing about this book is that you can open the book and start reading at any point and be able to clearly understand the subject matter. If you aren't one already, people will think you are a genius. Believe me. There is an introductory section of the book with three flavors: Cybersecurity, Cloud Computing, and Systems Ontology, all related to computers, artificial intelligence, and managing uncertainty. It is not intended for specialists. It is too simple for them. As unusual as that sounds, there is a very good reason for its existence. There are existing books on the subjects that are very good but are very difficult to read. It's straightforward. The concepts are complicated and some require complex math. Cybersecurity is about maintaining a secure environment for just about everything we do with computers. Cloud computing is intended to share the computer space between organization and people. Ontology is then study what exists. It is philosophical. Ontology is about the existence of things that exist and how to describe and analyze them. In the world of philosophy, there are two basic concepts: there are synthetic things and analytic things. Synthetic things are based on ideas. Analytic things are about things that actually exist. That's a bit simple but it is all we need at the moment. How is it that we can know about things that exist? We have to be able to describe them. It's that simple. This last book covers the subject of managing uncertainty. It is both a text book and a reference book on the application of Dempster-Shafer theory that has commanded a lot of attention in the business community. There is not much written on using the techniques and that is unfortunate. The methods are extremely powerful and management and technical persons should know of their existence. A math background is not required to read and use the methods even though some math descriptive techniques are necessary for efficiency of expression. Actually, the reader only needs to find out what can be done without having to actually do it. Finally, have a pleasurable reading. You deserve it.

Artificial Intelligence (AI) in Social Research Prokopis A. Christou, 2025-04-08 The field of social research is characterized by its broad scope and interdisciplinary nature encompassing the examination of human behaviour societies and various facets of social existence however it is influenced by numerous factors including technological advancements It is therefore no surprise that Artificial Intelligence AI has rapidly become a driving force bringing about substantial transformations within the field The use of AI assisted tools and

programmes for the collection analysis and interpretation of both quantitative and qualitative data is increasing at a remarkable pace The implications of utilizing these applications are significant and noteworthy While these technologies present numerous opportunities it is important to acknowledge the accompanying dilemmas and risks associated with this form of technological advancement With a focus on AI s research implications this book explores various considerations and examples across different disciplines of social research

Getting Skills Right Training Supply for the Green and AI Transitions Equipping Workers with the Right Skills OECD,2024-12-11 Adult learning systems are being called upon to prepare workers for major labour market shifts including the green transition and the rise of artificial intelligence AI in the workplace While initial education is important upskilling and reskilling the existing workforce is essential to help individuals and businesses adapt and prepare for these transitions Policy makers face the challenge of ensuring training is both relevant and inclusive yet there is limited understanding of whether current training supply is sufficient to meet current and future skill needs Most research focuses on the demand for skills with little insight into the supply To fill this gap this report uses evidence from new OECD questionnaires and an analysis of training catalogues to evaluate whether current training supply aligns with the skills needed for the green and AI transitions It also provides insight into the accessibility and flexibility of training efforts to guide policy makers in their efforts to develop more effective inclusive training strategies
