Frontiers of Human Centricity in the Artificial Intelligence-Driven Society 5.0 Sameh Reyad,2024-12-07

According to Serpa in MDPI encyclopedia 3 Society 5.0 can be realized as a concept and a guide for social development with a profound impact on current societal structures in multiple levels. Society 5.0 achieves advanced convergence between cyberspace and physical space enabling AI based on big data and robots to perform or support as an agent the work and adjustments that humans have done up to now. Deguchi et al 4 define Society 5.0 as a highly intelligent society based on generation processing exchange of data and more specifically knowledge through the connection of the physical environment with the cyberspace. Achieving Society 5.0 with these attributes would enable the world to realize economic development while solving key social problems. It would additionally contribute to achieving the SDGs established by the United Nations. Despite the differences in formulation of the names of these periods and societies it is obvious that each of them became a basis for step like growth in developed society at specific time periods. Scale character and depth of these changes are different in different countries. Consequently to address the aims of the book it seeks exploratory empirical interpretive and theoretical research built on either primary or secondary data. The approaches suggested are not exhaustive and can be extended upon by the researchers. In addition the book will contribute towards the UN's sustainable development goals. In support of UN's efforts towards a more digital economy this book aims to debate and discuss the history genesis future opportunities and challenges of transitioning to Society 5.0 and provides a holistic perspective on a variety of topics special topics which contribute towards the optimal attainment of the SDGs particularly in terms of social dimensions. Finally this book provides a platform for researchers academics and professionals to the transition and technological enablers of industrial revolutions through empirical or exploratory studies that use a variety of innovative approaches. The target audience of the book includes researchers and scholars who will find in its comprehensive knowledge about industry 4.0 industry 5.0 society 5.0 and its contribution to economic growth and sustainable development goals SDGs. Furthermore the book's secondary target audience are teachers managers strategists professionals governments and policymakers.

Hands-On Transfer Learning with Python Dipanjan Sarkar,Raghav Bali,Tamoghna Ghosh,2018-08-31 Deep learning simplified by taking supervised unsupervised and reinforcement learning to the next level using the Python ecosystem. Key Features Build deep learning models with transfer learning principles in Python implement transfer learning to solve real world research problems Perform complex operations such as image captioning neural style transfer. Book Description Transfer learning is a machine learning ML technique where knowledge gained during training a set of problems can be used to solve other similar problems. The purpose of this book is two fold firstly we focus on detailed coverage of deep learning DL and transfer learning comparing and contrasting the two with easy to follow concepts and examples. The second area of focus is real world examples and research problems using TensorFlow Keras and the Python ecosystem with hands on examples. The book starts

with the key essential concepts of ML and DL followed by depiction and coverage of important DL architectures such as convolutional neural networks CNNs deep neural networks DNNs recurrent neural networks RNNs long short term memory LSTM and capsule networks Our focus then shifts to transfer learning concepts such as model freezing fine tuning pre trained models including VGG inception ResNet and how these systems perform better than DL models with practical examples In the concluding chapters we will focus on a multitude of real world case studies and problems associated with areas such as computer vision audio analysis and natural language processing NLP By the end of this book you will be able to implement both DL and transfer learning principles in your own systems What you will learn Set up your own DL environment with graphics processing unit GPU and Cloud support Delve into transfer learning principles with ML and DL models Explore various DL architectures including CNN LSTM and capsule networks Learn about data and network representation and loss functions Get to grips with models and strategies in transfer learning Walk through potential challenges in building complex transfer learning models from scratch Explore real world research problems related to computer vision and audio analysis Understand how transfer learning can be leveraged in NLP Who this book is for Hands On Transfer Learning with Python is for data scientists machine learning engineers analysts and developers with an interest in data and applying state of the art transfer learning methodologies to solve tough real world problems Basic proficiency in machine learning and Python is required

Artificial Intelligence Alan Dix, 2025-06-16 An authoritative and accessible one stop resource the first edition of An Introduction to Artificial Intelligence presented one of the first comprehensive examinations of AI Designed to provide an understanding of the foundations of artificial intelligence it examined the central computational techniques employed by AI including knowledge representation search reasoning and learning as well as the principal application domains of expert systems natural language vision robotics software agents and cognitive modelling Many of the major philosophical and ethical issues of AI were also introduced This new edition expands and revises the book throughout with new material to augment existing chapters including short case studies as well as adding new chapters on explainable AI big data and deep learning temporal and web scale data statistical methods and data wrangling It expands the book's focus on human centred AI covering gender ethnic and social bias the need for transparency intelligent user interfaces and designing interactions to aid machine learning With detailed well illustrated examples and exercises throughout this book provides a substantial and robust introduction to artificial intelligence in a clear and concise coursebook form It stands as a core text for all students and computer scientists approaching AI You can also visit the author website for further resources <https://alandix.com/aibook>
