Successful Process Mining Projects Roland Woldt, 2025-09-15 Driving blind and too fast or not fast enough Most organizations have a hard time seeing where their performance lacks They see the metrics from the past but don't have visibility into how these numbers were produced What went well and what did not go so well and why So they have no idea how to improve their processes Do organizations measure the performance of their processes Well often I see only some lagging metrics being measured There are almost no predictive measures being defined and processes are not adapted to changing situations for example when it comes to delays of a supplier shipment There are just a few organizations that actually have their processes formally designed in the form of process models And those who do might see them only as an exercise to appease the gods their management or the regulators This creates interesting results when it comes to audits some poor souls figuring out what actually happens which might lead to regulatory notes that you have not made enough progress or even to hefty fines Overall I am missing an awareness of the need to measure what you are doing Some smart person once said You can only measure what you see and how boring would a football match be if we had not defined what winning means and how you can create the necessary points on the scoreboard Process Intelligence a new frontier for Process Management Over the last couple of years I have seen more interest in addressing these issues Process mining is the speedometer for your business It gives you visibility into how your processes are executed Not only the happy path that you might or might not have documented but all variations that you get from your runtime systems Process mining gives you calculated performance metrics out of the box like frequencies and times and shows you where you have rework or other unwanted behaviors Dashboards show metrics that allow you to investigate your performance hypotheses Data from mining can be embedded in existing BI dashboards You can trigger actions from thresholds and interact with running process instances think notifications alerts or transactions Process mining is embedded in a larger BPM practice You can download

discovered processes to use for future state design or simulation Or you upload reference processes and the tool checks to what degree you have conformed to how the work should be done Mining technologies close the missing gap in the process lifecycle and provide a data driven analysis approach for performance management Who is this book for This book is for people who are serious about how they can improve how their organizations run and how they can make their next large transformation project a success It is for the process and architecture practitioners who run their programs for years and don t get the visibility that they deserve It is for the analysts who want to switch their practices to a data driven approach while not forgetting the human contributions in the analysis and for whom the words Digital Gemba sound good And it is for the curious folks who have heard about process intelligence and were wondering what this means and how this fits into their organizations without creating another hype and disappointment when the results of the first project do not meet expectations As you know the first time you do something you most likely suck and that is the same here But wait this is not all This book also comes with an accompanying website which includes additional tools all graphics as PDF and a checklist for your mining projects It also comes with the necessary source files data workflows reference models in BPMN format an ARIS database and an ARIS Process Mining project *Entrepreneurship in Media and Entertainment* Alex

Connock,2025-10-28 Where do ideas like Pokemon or Harry Potter come from How do hit artists like Charlie XCX happen How are stars like MrBeast created How are high value entrepreneurial exits created *Entrepreneurship in Media and Entertainment Hits and Value Creation* is the detailed global go to guide to the journey of a startup in the fast evolving global creative industries Written by Oxford academic and media entrepreneur Alex Connock the book spans the lifetime of an entrepreneurial venture through seven key stages and value drivers startup ideas talent technology engagement scaleup and exit Covering entertainment in video games TV film streaming the creator economy music publishing advertising live entertainment theatre and VR AR this book has a truly global reach with cases from Nigeria to Ghana South Africa Saudi Arabia India China Japan Indonesia Malaysia South Korea Australia Vietnam Brazil and Mexico as well as Europe the UK and US The impact of artificial intelligence is embedded throughout from Generative AI and copyright to content and collaborative filtering in AI powered streaming Filled with examples the book dives deep into the careers of stars the genesis of hits the power of creators and the best thinking on ideas generation Theoretical concepts are leveraged to analyze startup creation and engagement along with practical valuation techniques throughout the entrepreneurial journey An up to date academically informed global guide this book is part of a trilogy that represents essential reading for students scholars and reflective practitioners of media management building on earlier titles on AI and live experience **AI for Small Business: Use ChatGPT, Automation, and AI Tools to Streamline Tasks and Boost Profits** Nathan Sterling,2025-05-04 Artificial Intelligence isn t just for big tech companies anymore it s for entrepreneurs freelancers and small business owners who want to work smarter save time and increase profits *AI for Small Business Use ChatGPT Automation and AI Tools to Streamline*
