Write Like You Teach James M. Lang,2025-05-09 This engaging guide offers practical advice to teachers on how to utilize their existing classroom skills to become more effective public writers After years spent cultivating their expertise and passion for a subject scholars are uniquely positioned to write great books Yet accustomed to writing for an audience of their peers many scholars find it challenging to adapt their writing to a style that is accessible and engaging to the general public James M Lang argues that academics are regularly called on to pitch their research to a general audience their undergraduates If only there were a way to translate the skills they use in the classroom into their writing In *Write Like You Teach* Lang a veteran writer and teacher distills the elements of good classroom teaching into guidelines for writing for a general audience He encourages authors to pay attention to how their readers learn and to embrace exploration experimentation and creativity in their writing Lang asks his readers to consider the questions that all great teachers ask themselves How will I get the attention of my students How do I make them curious about the subject What stories or examples will illustrate the more difficult concepts or theories in the course When will I pause in the class and give students

a break from hard thinking What will I do at the end of the class to remind students about my key messages and leave them wanting to know more Write Like You Teach includes examples from successful writers and useful anecdotes from Lang's own classroom and writing career Indeed Lang takes his own advice to heart like a good teacher he varies the form of each chapter making sure to introduce some surprises to keep the reader engaged Each chapter ends with writing prompts to help readers practice their newly acquired skills and an appendix provides additional advice on publishing and promoting one's work Teachers who follow Lang's suggestions will find new ways to connect with their readers and like any good student they will never approach writing the same way again *Teaching with AI* José Antonio Bowen, C. Edward Watson, 2025-12-02

have been developed Boekaerts 2011 Butler and Cartier 2018 Efklides 2011 Hadwin J rvel and Miller 2017 Pintrich 2000 Winne and Hadwin 1998 Zimmmerman 2000 The authors agree that self regulated learning is a cyclical multidimensional process that includes the interaction of personal cognitive metacognitive motivational emotional behavioral and environmental factors Panadero 2017 which enable students to better manage their learning The ability to self regulate learning contributes to positive educational outcomes but also to the development of lifelong learning skills which facilitate coping with the demands of modern society However the learning of a significant part of students is not optimally self regulated Kramarski and Michalsky 2009 Teachers as agents of self regulated learning SRL can promote SRL in a variety of direct and indirect ways by teaching students effective learning strategies or by structuring stimulating learning environments Dignath van Ewijk and van der Werf 2012 Most teachers agree that students need help to become self regulated learners and express positive beliefs about SRL However they feel uncertain about how to promote students SRL and stimulate SRL to a limited extent Dignath and B ttner 2018 Dignath van Ewijk et al 2012 Karlen et al 2020 Kistner et al 2015 Perry et al 2008 Spruce and Bol 2015 imi a i et al 2023 Vandeveld et al 2012 Teaching students how to self regulate their learning improves their performance However it is still not clear which specific learning strategies should be taught and how they should be taught in order to improve student performance Research shows that different strategies are effective in different disciplines reading writing mathematics science de Boer et al 2012 Encouraging SRL depends on numerous factors related to the teacher teacher beliefs gender teaching experience competences etc class school subject but also the students themselves abilities age SES etc Chatzistamatiou et al 2013 De Smul et al 2018 Dignath van Ewijk 2016 Dignath van Ewijk and van der Wert 2012 Elmas et al 2011 Fauzi and Widjajanti 2018 Hargreaves 2005 Karlen et al 2023 Lombaerts et al 2007 Lombaerts et al 2009 Moos and Ringdal 2012 Peeters et al 2015 imi a i et al 2021 imi a i et al 2023 Vandeveld et al 2012 Yan 2018 The results of these studies are often inconclusive Therefore the goal of this Research Topic is to gather new knowledge about the factors that influence the activation of SRL from the perspective of teachers students classes schools and even from the perspective of educational policies of different educational systems countries Of particular interest is to examine the effects of different strategies for improving SRL considering different characteristics of students fields disciplines and level of education early childhood primary secondary or higher education and to examine the mechanisms of these effects It is necessary to investigate how students and teachers perceive the effectiveness of different methods of encouraging SRL Most studies of teachers promotion of SRL were conducted on preservice teachers as part of the evaluation of teacher training programs for the promotion of SRL but there is little research in the area of in service teachers practice to promote SRL Therefore this Research Topic aims to offer a synthesis of the latest research on fostering SRL and to collect original contributions that can offer new insights and incentives for future research This collection of articles welcomes both theoretical and empirical qualitative and or quantitative papers that contribute to the consolidation of current knowledge

highlight limitations and critical issues of current research or offer new ideas and thinking to support future research Original empirical research from different parts of the world including validation of instruments in cultures where they have not yet been tested is welcome and cross cultural comparisons are especially appreciated We also welcome review papers systematic reviews and meta analyses that have a significant impact on understanding the relationship between fostering self regulated learning and self regulation of learning and the relationship with learning outcomes Papers within this research topic should offer a synthesis of the latest knowledge in this research area and stimulate future research **PC AI.** ,1987

Deepfakes Graham Meikle,2022-09-22 What happens when we can no longer believe what we see Show the AI technologies that create deepfakes enough images of a celebrity or a politician and they will generate a convincing video in which that person appears to say and do things they have never actually said or done The result is a media environment in which anyone s face and image can be remixed and manipulated Graham Meikle explains how deepfakes synthetic media are made and used From celebrity porn and political satire to movie mash ups and disinformation campaigns this book explores themes of trust and consent as face swapping software becomes more common Meikle argues that deepfake videos allow for a new perspective on the taken for granted nature of contemporary media in which our capacity to remix and share content increasingly conflicts with our capacity to trust The book analyses how such videos deepen the social media environment in which the public and the personal converge and in which all human experience becomes data to be shared Timely clear and accessibly written this is an essential text for students and scholars of media communication cultural studies and sociology as well as general readers Who's who in Writers, Editors & Poets, United States & Canada ,1989 **Training and**
