B2B Marketing Guidebook - Vol. 2 Uwe Seebacher, 2025-08-11 The future of B2B marketing isn't coming; it's already here. The second volume of the significantly updated edition of B2B Marketing dives deep into the execution layer of modern marketing. This edition is packed with AI-driven methods, advanced digital tactics, and best-in-class case studies from global leading companies such as Daikin, Mayr-Predictores, SK Laser, Thyssenkrupp, and W. Rth to help B2B professionals scale growth, deepen relevance, and lead in a data-first world. Whether building a smarter lead generation engine, optimizing touchpoints, embracing account-based strategies, or navigating social selling and influencer marketing, this book provides the frameworks, tools, and insights to turn vision into reality. Readers will learn how to ignite digital growth, master touchpoint performance management, and align content strategy with AI. Essential for CMOs, marketing professionals, strategists, and consultants, this volume is a must-have for moving from theory to results. Volume 1 gave you the roadmap; Volume 2 gives you the tools to drive it.

Strategic Planning for Public Relations Deborah A. Silverman, Ronald D. Smith, 2024-03-14 The seventh edition of Strategic Planning for Public Relations maintains its status as a leading text to guide students in developing successful public relations campaigns. Deborah Silverman and Ronald Smith bring their experience as instructors and public relations professionals to the book, providing clear step-by-step guidance on how to plan and implement strategic communications campaigns. This new edition includes diverse examples of current cases along with classic cases that stand the test of time. It includes new Ethics Minutes scenarios in each step, a new research step, and examples of award-winning public relations campaigns. It also significantly increases information on social media and features a reformatting of the tactics step into four separate parts based on the PESO model: paid media, earned media, shared media, and owned media. As a leader in teaching public relations strategy, this text is ideal for students in upper division undergraduate and graduate courses in public relations strategy and campaigns. Complementing the book are online resources for both students and instructors. For students: step overviews, useful links to professional organizations, and resources; checklists for the ten steps in the planning process; and two sample campaigns. For instructors: an instructors manual, PowerPoint slides, sample syllabi, a critique evaluation worksheet, and checklists for the ten steps in the planning process. Cybersecurity in the Age of Artificial Intelligence Pasi Koistinen, 2025-07-12 Artificial intelligence has stopped knocking politely on the door of cybersecurity it has kicked it open set up shop inside and begun rewriting the rules From generative phishing emails indistinguishable from trusted colleagues to adaptive malware that evolves faster than defenders can react AI has made the threat landscape faster smarter and far less predictable This book is a practical guide to that unsettling reality It doesn't trade in hype or hand waving optimism Instead it lays out in plain language how AI systems create new risks what happens when security practices built for deterministic software fail and why human vigilance and organizational discipline are more important than ever Inside you'll discover How attackers are already using AI to automate reconnaissance generate malicious code and industrialize social engineering at a scale no human team could match Why defending AI is a fundamentally different challenge with attack surfaces embedded in training data model weights and seemingly innocuous prompts How familiar safeguards like static rules perimeter defenses and blacklists fall apart when faced with systems that learn infer and sometimes hallucinate What it takes to design secure trustworthy AI systems from threat modeling and auditing pipelines to deploying explainable models that don't sacrifice accountability for convenience Written for security leaders engineers policymakers and technologists who recognize that the convergence of AI and cybersecurity isn't theoretical it's already operational this book offers a strategic roadmap for navigating a landscape where yesterday's defenses are no longer enough You'll explore real world case studies chatbots leaking confidential data with alarming politeness AI driven phishing campaigns that slip past even well trained employees and defensive models that fail silently because they can't explain their own reasoning Along the way you'll learn frameworks to separate the promising from the perilous the actionable from the aspirational Artificial Intelligence Cybersecurity isn't a manual for fine tuning models or a primer for beginners It assumes you already sense that something is shifting and provides the clarity examples and strategies to respond If you're responsible for securing critical systems or shaping the policies that govern them this book will help you ask better questions make better decisions and avoid the costly mistake of treating AI as just another line item in your technology stack Because in this new era the question isn't whether AI will reshape your security strategy The question is whether you'll be ready when it does
