Toward a Philosophy of Organized Student Activities Herbert Hewitt Stroup, 1964 Toward a Philosophy of Organized Student Activities was first published in 1964 The increased scope and complexity of student personnel work in colleges and universities in recent years has emphasized the need for a more mature philosophy in the field This book outlines such a philosophy after tracing the growth of student activities in American institutions of higher education The author develops a number of themes to illustrate the present lack of coherent doctrine in organized student activities to analyze the problems involved and to make proposals for their solution He attacks some misconceptions of the proper function of student activities he does not believe for example that the development of the whole personality is a proper concern of the discipline nor on the other hand that its function is purely custodial He is concerned with defining the nature of the authority of the university in relation to the student and he shows that much of the difficulty in maintaining control of students stems from social and economic changes such as the decline of the hierarchical family loose notions of individualism and the view of education as a commodity He makes clear his conviction that student activities given the proper objectives

and the means of realizing them can contribute greatly to the educational process Administrators and faculty members outside the field may gain insight into organized student activities through this book and it will of course be of particular interest to workers in the field This is volume 7 in the Minnesota Library on Student Personnel Work of which E G Williamson is editor
