

Chapter 1- Introduction

Introductory statement

Technology has long been a part of both education and agriculture, and in recent years, in 2010, the United States Department of Education's Office of Educational Technology published a document titled "Transforming American Education - Learning Powered by Technology". In this document, the Department states that "Technology is at the core of virtually every aspect of our daily lives and work, and we must leverage it to provide engaging and powerful learning experiences and content" (2010, p. 7). The document also lays out certain goals for education technology usage in America. Examples of those goals are:

1.2 - States, districts, and others should develop and implement learning resources that use technology to embody design principles from learning sciences.

3.1 - Expand opportunities for educators to have access to technology-based content, resources, and tools where and when they need them.

5.3 - Develop useful metrics for the educational use of technology in states and districts.
