The Ideas That Rule Us Chris Grocott, 2024-10-07 It may seem surprising that the economic choices we make in society are often determined by ideas rather than scientific evidence or financial resources The consequences of such choices are often stark such as the austerity policies which eroded our ability to withstand crises like the Covid 19 pandemic This book explores the ideas that rule how our economy works how government operates and how workers organise A small number of historical economic ideas remain stubbornly prevalent and powerful today However they are largely based on questionable assumptions about human behaviour and unproven theoretical ideas about economics They were founded within the realms of philosophy and politics rather than hard science This book illustrates how politicians have selectively borrowed convenient economic concepts in order to promote and defend policies which entrench and escalate inequalities and other structural problems This accessible book invites readers to question the ideas that rule us and explore the challenges facing society It invites progressive thought about how we need to urgently organise action for the future

The No-Fly Zone in US Foreign Policy Gustav Meibauer, 2025-09-12 The no fly zone is a frequently used instrument in the US foreign policy arsenal despite detrimental or even catastrophic results This book examines why the instrument has such a hold on leaders imaginations and rhetoric despite its patchy record in practice Examining detailed historical case studies from conflicts in Iraq Bosnia Kosovo South Sudan Darfur Libya and Syria the book shows how debates about and actual use of no fly zones in US foreign policy have not been primarily about managing conflict or protecting civilians Instead the focus is often on navigating contradictory international and domestic political incentives and constraints leading to US intervention in an ill considered and incremental manner
