A Beginner's Guide to Introduce Artificial Intelligence in Teaching and Learning Muralidhar Kurni, Mujeeb Shaik Mohammed, Srinivasa K G, 2023-06-28 This book reimagines education in today's Artificial Intelligence AI world and the Fourth Industrial Revolution. Artificial intelligence will drastically affect every industry and sector, and education is no exception. This book aims at how AI may impact the teaching and learning process in education. This book is designed to demystify AI for teachers and learners. This book will help improve education and support institutions in the phenomena of the emergence of AI in teaching and learning. This book presents a comprehensive study of how AI improves teaching and learning from AI-based learning platforms to AI-assisted proctored examinations. This book provides educators, learners, and administrators on how AI makes sense in their everyday practice. Describing the application of AI in ten key aspects, this comprehensive volume prepares educational leaders, designers, researchers, and policymakers to effectively rethink the teaching and learning process and environments that students need to thrive. The readers of this book never fall behind the fast pace and promising innovations of today's most advanced learning technology. **Impact and implications of AI methods and tools for the future of education**

Kingsley Okoye, Samira Hosseini, Kamal Kant Hiran, Julius Nganji, 2024-06-07 The congruence of technology such as AI and its use for education can help transform the different pedagogical practices and future of education. Educational organizations like The UNESCO and The World Bank are already calling for research and development-oriented projects and creation mobilization of technological initiatives on how to reimagine education and operationalize the use of digital technologies for its purpose, the Digitized Education. Those goals mean or include methodological approaches and wide adoption of the AI methods in fostering education in the classroom or learning environments. Also noteworthy is the fact that digitized education is now an inevitable and integral element to achieving the global sustainable development goals (SDGs), particularly the SDG4 that promotes quality of education.

ChatGPT eBook GURMEET SINGH DANG, **Four Battlegrounds** Paul Scharre, 2023-02-28 An NPR 2023 Books We Love Pick One of the Next Big Idea Club's Must Read Books. An invaluable primer to arguably the most important driver of change for our future. P. W. Singer, author of *Burn In*. An award-winning defense expert tells the story of today's great power rivalry: the struggle to control artificial intelligence. A new industrial revolution has begun. Like mechanization or electricity before it, artificial intelligence will touch every aspect of our lives and cause profound disruptions in the balance of global power, especially among the AI superpowers: China, the United States, and Europe. Autonomous weapons expert Paul Scharre takes readers inside the fierce competition to develop and implement this game-changing technology and dominate the future. *Four Battlegrounds* argues that four key elements define this struggle: data, computing power, talent, and institutions. Data is a vital resource like coal or oil, but it must be collected and refined. Advanced computer chips are the essence of computing power; control over chip supply chains grants leverage over rivals. Talent is about people: which country attracts the best

researchers and most advanced technology companies The fourth battlefield is maybe the most critical the ultimate global leader in AI will have institutions that effectively incorporate AI into their economy society and especially their military Scharre's account surges with futuristic technology He explores the ways AI systems are already discovering new strategies via millions of war game simulations developing combat tactics better than any human tracking billions of people using biometrics and subtly controlling information with secret algorithms He visits China's National Team of leading AI companies to show the chilling synergy between China's government private sector and surveillance state He interviews Pentagon leadership and tours U S Defense Department offices in Silicon Valley revealing deep tensions between the military and tech giants who control data chips and talent Yet he concludes that those tensions inherent to our democratic system create resilience and resistance to autocracy in the face of overwhelmingly powerful technology Engaging and direct Four Battlegrounds offers a vivid picture of how AI is transforming warfare global security and the future of human freedom and what it will take for democracies to remain at the forefront of the world order
