An invigorating, thought provoking and positive look at the rise of automation that explores how professionals across industries can find sustainable careers in the near future. Nearly half of all working Americans could risk losing their jobs because of technology. It's not only blue collar jobs at stake. Millions of educated knowledge workers, writers, paralegals, assistants, medical technicians are threatened by accelerating advances in artificial intelligence. The industrial revolution shifted workers from farms to factories. In the first era of automation, machines relieved humans of manually exhausting work. Today, Era Two of automation continues to wash across the entire services based economy that has replaced jobs in agriculture and manufacturing. Era Three and the rise of AI is dawning. Smart computers
