Prof. N. Rajalingam, Prof. S. Madhavan, Prof. P. Ravi, Dr. T. Helan, Dr. G. Magesh Kuttalam, Dr. M. Bhoopal, Dr. K. N. Marimuthu, The buzz word USD 5 Trillion size of Indian economy in the next five years is more than the current size of the economy of Japan, Germany. It is both ambitious and inspiring. It requires accelerating the current pace of innovation and development in addition to the upgradation of the systems and infrastructure so as to provide a better ecosystem than now. It also requires to lift the spirit of young and old citizens living both in rural and urban areas of the country. This virtual conference in its endeavour is attempting to provide space for the think tanks from the industry and the academia to share their creative insights. *Story Machines: How Computers Have Become Creative Writers* Mike Sharples, Rafael Pérez y Pérez, 2022-07-05. This fascinating book explores machines as authors of fiction, past, present, and future. For centuries, writers have dreamed of mechanical storytellers. We can now build these devices. What will be the impact on society of AI programs that generate original stories to entertain and persuade? What can we learn about human creativity from probing how they work? In *Story Machines*, two pioneers of creative artificial intelligence explore the design and impact of AI story generators. The book covers three themes: language generators that compose coherent text, storyworlds with believable characters, and AI models of human storytellers. Providing examples of story machines through the ages, it covers the history, recent developments, and future implications of automated story generation. Anyone with an interest in story writing will gain a new perspective on what it means to be a creative writer, what parts of creativity can be mechanized, and what is essentially human. *Story Machines* is for those who have ever wondered what makes a good story, why stories are important to us, and what the future holds for storytelling.
