#### **Education Futures for School Leadership** J-C

Couture, Stephen Murgatroyd, 2024-10-21 *Education Futures for School Leadership* is a comprehensive resource to support school leaders as they encounter the growing complexity and uncertainties that characterize life in schools today. Moving beyond conventional change management literature, this book invites current and aspiring school leaders to apply the interdisciplinary tools of futures studies and strategic foresight to their work. Given our shared global challenges, young people deserve schools that are agile, adaptive, and responsive to many possible futures. Driven by the imperatives of equity and inclusion, the authors provide practical evidence, informed strategies, real-world examples, and use cases of futures thinking applied to school staff development and change strategies. Each chapter engages with key educational realities: differentiating instructional planning and assessment, the impacts of artificial intelligence and other technologies, the growing psycho-social issues young people are facing, and more. Informed by years of international collaboration with forward-thinking school leaders and scholars, this book is both a field guide and a call to action for navigating the influence of the future on our present moment and the challenges and promises shaping school life today.

space of explainable chatbot interfaces through ChatrEx. We followed the iterative design and prototyping approach and designed two novel in-application chatbot interfaces: ChatrEx VINC and ChatrEx VST that provide visual example-based step-by-step explanations about the underlying working of a chatbot during a breakdown. ChatrEx VINC provides visual example-based step-by-step explanations in context of the chat window, whereas ChatrEx VST provides explanations as a visual tour overlaid on the application interface. Our formative study with 11 participants elicited informal user feedback to help us iterate on our design ideas at each of the design and ideation phases, and we implemented our final designs as web-based interactive chatbots for complex spreadsheet tasks. We conducted an observational study with 14 participants to compare our designs with current state-of-the-art chatbot interfaces and assessed their strengths and weaknesses. We found that visual explanations in both ChatrEx VINC and ChatrEx VST enhanced users' understanding of the reasons for a conversational breakdown and improved users' perceptions of usefulness, transparency, and trust. We identify several opportunities for future HCI research to exploit explainable chatbot interfaces and better support human chatbot interaction.
