Innovation Navigator Tucker J Marion, Sebastian Fixson, 2025-10-28 The Innovation Navigator returns with a revised edition and a fresh look at the shifting landscape of modern innovation With the rise of artificial intelligence digital design and collaborative platforms organizations face new opportunities and challenges in managing their innovation processes Renowned entrepreneurial academics Tucker Marion and Sebastian Fixson present a comprehensive update to their groundbreaking guide including new chapters on AI s role in enhancing creativity decision making and product development new metrics for managing innovation and thoughts on employee skill development The second edition of The Innovation Navigator also features updated and illustrative case studies of companies such as Microsoft Ford Merck and OpenAI This updated edition provides practical frameworks for applying AI across the original four key innovation modes specialist venture community and network and offers insights on adopting multimodal strategies to stay ahead in today s competitive environment Whether you re a corporate leader or a novice entrepreneur this book will equip you with the tools to navigate the challenges of AI driven digital transformation and seize new opportunities in a powerfully evolving market

Cybersecurity in the Age of Artificial Intelligence Pasi Koistinen, 2025-07-12 Artificial intelligence has stopped knocking politely on the door of cybersecurity it has kicked it open set up shop inside and begun rewriting the rules From generative phishing emails indistinguishable from trusted colleagues to adaptive malware that evolves faster than defenders can react AI has made the threat landscape faster smarter and far less predictable This book is a practical guide to that unsettling reality It doesn t trade in hype or hand waving optimism Instead it lays out in plain language how AI systems create new risks what happens when security practices built for deterministic software fail and why human vigilance and organizational discipline are more important than ever Inside you ll discover How attackers are already using AI to automate reconnaissance generate malicious code and industrialize social engineering at a scale no human team could match Why defending AI is a fundamentally different challenge with attack surfaces embedded in training data model weights and seemingly innocuous prompts How familiar safeguards like static rules perimeter defenses and blacklists fall apart when faced with systems that learn infer and sometimes hallucinate What it takes to design secure trustworthy AI systems from threat modeling and auditing pipelines to deploying explainable models that don t sacrifice accountability for convenience

Written for security leaders engineers policymakers and technologists who recognize that the convergence of AI and cybersecurity isn't theoretical it's already operational this book offers a strategic roadmap for navigating a landscape where yesterday's defenses are no longer enough You'll explore real world case studies chatbots leaking confidential data with alarming politeness AI driven phishing campaigns that slip past even well trained employees and defensive models that fail silently because they can't explain their own reasoning Along the way you'll learn frameworks to separate the promising from the perilous the actionable from the aspirational Artificial Intelligence Cybersecurity isn't a manual for fine tuning models or a primer for beginners It assumes you already sense that something is shifting and provides the clarity examples and strategies to respond If you're responsible for securing critical systems or shaping the policies that govern them this book will help you ask better questions make better decisions and avoid the costly mistake of treating AI as just another line item in your technology stack Because in this new era the question isn't whether AI will reshape your security strategy The question is whether you'll be ready when it does

Artificial Media Nelson Zagalo, Damián Keller, 2025-07-29 A

groundbreaking exploration of the evolving relationship between the fields of artificial intelligence and creativity studies Artificial Media charts the course of a transformative path toward hybrid methodologies involving computing and human centric approaches Scholars and practitioners from leading research centers in South America Asia and Europe delve into theoretical and philosophical frameworks practical deployments and data based critical analyses of artificial media initiatives that reconfigure authorship and collaboration Co creation collective memory and situated knowledge practices are featured in multiple hands on examples of technological design music visual arts journalistic and educational projects that address the ethical and social implications of generative techniques Through an interdisciplinary lens this collection projects a nuanced panorama of both the remarkable results and the complex challenges of emerging artificial media methods offering practical insights for anyone seeking to engage with the future of creativity in the age of autonomous machines
