**The Writers Directory**, 2013      **Resources in Education**, 1976      AI Literacy in K-16 Classrooms Davy Tsz Kit Ng, Jac Ka Lok Leung, Maggie Jiahong Su, Iris Heung Yue Yim, Maggie Shen Qiao, Samuel Kai Wah Chu, 2022-12-07

Artificial Intelligence is at the top of the agenda for education leaders, scientists, technologists, and policy makers in educating the next generation across the globe. Beyond applying AI in daily life applications and educational tools, understanding how to learn and teach AI is increasingly important. Despite these emerging technology breakthroughs, AI learning is still new to educators, especially to K-16 teachers. There is a lack of evidence-based studies that inform them about AI learning, including design principles for building a set of curriculum content and pedagogical approaches, as well as technological tools. Teaching AI concepts and techniques from programming languages and developmentally appropriate learning tools, e.g., robotics, serious games, software, intelligent agents across different education levels, emerged in recent years. The primary purpose of this book is to respond to the need to conceptualize the emerging term AI literacy and investigate how to teach and learn AI in K-16 education settings. This book examines different aspects of learning artefacts, pedagogies, content, knowledge, and assessment methods of AI literacy education, from theoretical discussions to practical recommendations for curriculum and instructional design. An exhaustive summary of current evidence with examples is illustrated in this book, as well as cutting-edge research that serves as an AI literacy model for different countries' contexts.

Part I: Conceptualizing AI literacy provides a detailed discussion on the development of the concepts and frameworks on AI literacy education, discusses the differences and similarities between AI in education, AIED, and AI literacy education, and illustrates the reasons why K-16 students need to learn AI. These concepts are brought together in Part II: K-16 AI literacy education to further summarize the pedagogies, learning content, learning tools, and assessment methods to inform K-16 educators how to design their AI instruction at each education level. After that, Part III: AI literacy for instructional designers explores how instructional designers, i.e., AI developers and teachers, prepare themselves to become ready to design developmentally appropriate tools, platforms, services, and curricula to empower students with AI literacy skills.
