**Start-Up Guide for Writers and Bloggers on How to Make Money Online** Zain van Heugten, 2014-11-11  
Affiliate marketing is a type of performance based marketing in which a business rewards one or more affiliates for each visitor or customer brought by the affiliate s own marketing efforts  
The industry has four core players the merchant also known as retailer or brand the network that contains offers for the affiliate to choose from and also takes care of the payments the publisher also known as the affiliate and the customer  
The market has grown in complexity resulting in the emergence of a secondary tier of players including affiliate management agencies super affiliates and specialized third party vendors  
Affiliate marketing overlaps with other Internet marketing methods to some degree because affiliates often use regular advertising methods  
Those methods include organic search engine optimization SEO paid search engine marketing PPC Pay Per Click e mail marketing content marketing and in some sense display advertising  
On the other hand affiliates sometimes use less orthodox techniques such as publishing reviews of products or services offered by a partner  
Affiliate marketing is commonly confused with referral marketing as both forms of marketing use third parties to drive sales to the retailer  
However both are distinct forms of marketing and the main difference between them is that affiliate marketing relies purely on financial motivations to drive sales while referral marketing relies on trust and personal relationships to drive sales      *Affiliate*
