Teaching Reading to American Indian/Alaska Native Students Jon Reyhner, 2001 **The Psychology Student Writer's Manual and Reader's Guide** Jill M. Scott, Gregory M. Scott, Stephen M. Garrison, 2018-03-02

The Psychology Student Writer's Manual 3 E is a practical guide to research reading and writing in the discipline. Ideal as either a companion or stand alone text for any psychology course that requires students to write papers. This clear and functional handbook shows how to research and write in psychology as well as improve one's overall writing ability. Covering every fundamental aspect of writing from content to form, grammar, tracking sources of information and citing sources, it assists students in preparing two specific types of papers: research reports and term papers. Comprehensive source. Contains all the information needed to write most types of papers typically assigned in the discipline of psychology. Provides students with a complete one-stop easy-to-follow reference source on how to research and write papers, including how to conduct research in psychology, how to find information on topics related to psychology, how to incorporate citations and more. Thorough review of writing basics and formatting instructions. Addresses fundamental concerns of all writers, exploring the reasons why we write, describing the writing process itself, and examining those elements of grammar, style, and punctuation that cause the most confusion among writers in general. Shows students the key elements of good writing and effective communication, giving students a quick and handy grammar reference source and providing them with a detailed easy-to-follow guide to preparing papers according to accepted formats. Creative writing assignments. Offers practical writing exercises with step-by-step instructions. Heightens students' interest in the study of psychology and frees professors from the duty of teaching students to write the papers most often assigned in psychology classes. APA standards. Complies with all APA style requirements; displays formats for text, title pages, reference pages, tables of contents in APA format; details the APA citation system and discusses the crucial responsibility of every psychology writer to use source material ethically. General analysis of psychology. Helps students obtain a deeper understanding of what constitutes the discipline of psychology so that they will become better and more educated writers on the subject.

The Radical Case for Teaching Skim Reading in First-Year Writing Ellen C. Carillo, 2025-10-15

The Radical Case for Teaching Skim Reading in First Year Writing encourages faculty, particularly in writing studies, to check internal biases toward deep reading and teach skim reading in first year writing courses. Written by Ellen C. Carillo, who has previously published on the importance of teaching deep reading, this small book is a controversial prompt for further discussion and exploration. Data from studies of the lived experiences of undergraduates indicate that students do not need deep reading practices in the majority of their classes across the disciplines and moreover that students succeed in their classes by skim reading. Rather than imagining an idealized set of circumstances that allow for sustained deep reading, as does a great deal of the scholarship on reading in writing studies, The Radical Case for Teaching Skim Reading in First Year Writing argues for teaching students reading practices that will support their success in their college

writing assignments rather than those strategies the field believes should support their success In our information landscape and our fragile democracy encouraging skimming as opposed to deep reading may seem like a gamble this very tendency toward the quick rather than the critical has undoubtedly contributed to the current crisis of mass misinformation However teaching students to use skim reading as a strategic tool for purposeful engagement and efficient yet thoughtful information filtering better equips them to navigate the rapidly changing information landscape and manage the fast paced flow of content from diverse media sources
