Transforming Academic Libraries Rajesh Singh, Shiva Kanaujia Sukula, 2025-07-25. The book comprises the proceedings of the International Conference on Academic Libraries ICAL 2023 in the context of developing a vision for the next generation of libraries which will contribute to nation building and give a competitive edge to the country in becoming a knowledge economy. The book provides a quality reading and exchange of ideas to all stakeholders to deliberate, dwell and brainstorm upon the diverse and enormous role that academic libraries may play in enhancing the higher education landscape in developed and developing countries with particular reference to India by 2030. The book includes literature and opportunities to identify the strengths and gaps in the academic library system and to suggest new management models, mechanisms, policies and national and international programs for reshaping academic libraries into next generation libraries for higher education.

Experimental Design in Psychology M. Kimberly MacLin, 2023-12-22. This text is about doing science and the active process of reading, learning, thinking, generating ideas, designing experiments and the logistics surrounding each step of the research process. In easy to read conversational language, Kim MacLin teaches students experimental design principles and techniques using a tutorial approach in which students read, critique and analyze over 75 actual experiments from every major area of psychology. She provides them with real world information about how science in psychology is conducted and how they can participate. Recognizing that students come to an experimental design course with their own interests and perspectives, MacLin covers many subdisciplines of psychology throughout the text including IO psychology, child psychology, social psychology, behavioral psychology, cognitive psychology, clinical psychology, health psychology, educational psychology, school psychology, legal psychology and personality psychology among others. Part I of the text is content oriented and provides an overview of the principles of experimental design. Part II contains annotated research articles for students to read and analyze. New sections on how to critically evaluate media reports of scientific findings in other words, how to identify fake news, authorship guidelines and decisions, survey research methods and AI tools have been included. Further expanded information on the Open Science movement and on ethics in research and methods to achieve

clarity and precision in thinking and writing are included This edition is up to date with the latest APA Publication Manual 7th edition and includes an overview of the bias free language guidelines the use of singular they and an ethical compliance checklist This text is essential reading for students and researchers interested in and studying experimental design in psychology
