Routledge Handbook of Technological Advances in Researching Language Learning Karim Sadeghi, 2024-11-29

The Routledge Handbook of Technological Advances in Researching Language Learning is the first volume to bring together the extant scholarship on the nature and role of digital technology in conducting second language research. The Handbook showcases technological advances including issues and considerations affecting research conduction in second language education. The contributions focus on the role of digital technology in researching second language education, second language acquisition, and applied linguistics. Contributions by both seasoned and junior scholars feature empirical studies and methodological and/or theoretical discussions of technological tools used or tools that can be used for conducting research into various aspects of second language learning and acquisition. This book will primarily appeal to academic specialists, practitioners, and professionals in the field of applied linguistics and second language education. The book will also be informative for scholars and professionals in disciplines such as educational technology and TESOL.

Technology-Mediated Learning Environments for Young English Learners L. Leann Parker, 2023-05-31. This book explores issues related to the use of technologies to support young second language learners and looks at promising areas for research design and development. Grounded in a sociocultural theoretical framework, it invites educators, researchers, and educational technology developers to consider a range of social and cultural factors in utilizing technology as a tool to help children from diverse linguistic and cultural backgrounds develop their English language and reading skills. A major contribution is the authors' consideration of ways that technology outside of school can benefit these students. English language development in school. The central chapters are counterpointed by invited reflections that bring to the discussion different yet complementary perspectives from notable scholars in the field of second language literacy and learning. Technology-Mediated Learning Environments for Young English Language Learners is targeted to researchers, educators, and policymakers in the areas of elementary education, after-school learning, second language teaching and learning, English language and literacy development, and reading.
