Digital Literacies Mark Pegrum, Nicky Hockly, Gavin Dudeney, 2022-05-11 Dramatic shifts in our communication landscape have made it crucial for language teaching to go beyond print literacy and encompass the digital literacies which are increasingly central to learners' personal, social, educational and professional lives. By situating these digital literacies within a clear theoretical framework, this book provides educators and students alike with not just the background for a deeper understanding of these key 21st century skills but also the rationale for integrating these skills into classroom practice. This is the first methodology book to address not just why but also how to teach digital literacies in the English language classroom. This book provides a theoretical framework through which to categorise and prioritise digital literacies. Practical classroom activities to help learners and teachers develop digital literacies in tandem with key language skills. A thorough analysis of the pedagogical implications of developing digital literacies in teaching practice. A consideration of exactly how to integrate digital literacies into the English language syllabus. Suggestions for teachers on how to continue their own professional development through PLNs (Personal Learning Networks) and how to access teacher development opportunities online. This book is ideal for English language teachers, English language learners of all ages and levels, academics and researchers of all age groups and levels, academics and students researching digital literacies, and anyone looking to expand their understanding of digital literacies within a teaching framework. **Internet of Things enabled**

Machine Learning for Biomedical Applications Neha Goel, Ravindra Kumar Yadav, 2024-11-29 The text begins by highlighting the benefits of the Internet of Things enabled machine learning in the healthcare sector, examines the diagnosis of diseases using machine learning algorithms, and analyzes security and privacy issues in the healthcare systems using the Internet of Things. The text elaborates on image processing implementation for medical images to detect and classify diseases based on magnetic resonance imaging and ultrasound images. This book covers the procedure to recognize emotions using image processing and the Internet of Things enabled machine learning. Highlights security and privacy issues in the healthcare system using the Internet of Things. Discusses classification and implementation techniques of image segmentation. Explains different algorithms of machine learning for image processing in a comprehensive manner. Provides computational intelligence on the Internet of Things for future biomedical applications including lung cancer. It is primarily written for graduate students and academic researchers in the fields of electrical engineering, electronics and communications engineering, computer science and engineering, and biomedical engineering.
