**Adolescent Use of New Media and Internet Technologies** Gordon P. D. Ingram, 2023-03-31 This book engages with contemporary and often polarizing debates surrounding the risks of adolescent use of digital media and internet technologies. By drawing on multiple research studies, the text synthesizes current understandings of the impacts of social network use, online gaming, pornography, and phenomena including cyberbullying, cyberstalking, and internet addiction to develop recommendations for the effective identification of at-risk youth as well as strategies for informed communication about online risks and opportunities. It shows how media discussion of risks to children and teenagers from new technology is highly emotive and often exaggerated, rooted in the moral panic surrounding new cultural practices that young people engage in but which adults do not understand. Online risks are thus conceptualized as centering on three areas specific to adolescence which have undergone radical changes due to new internet technology. These include young people's identity, the types of content that are accessed, and social relationships. The author shows how these matters stem from the potential of new technology to establish new interpersonal connections, emphasizing how it brings opportunities as much as risks. As such, he provides a uniquely balanced discussion of potential dangers while also emphasizing the opportunities for social, academic, and personal growth which new technologies afford young people. It will be indispensable for researchers and clinicians interested in assessing levels of online risk, as well as scholars and educators with interests in cyberpsychology, social psychology, cyber culture, social aspects of computing and media, and adolescent development.

**Youth Created Media on the Climate Crisis** Richard Beach, Blaine Smith, 2023-07-18 This timely book provides effective methods and authentic examples of teaching about climate change through digital and multimodal media production in the English Language Arts classroom. The chapters in this edited volume demonstrate the benefits of addressing climate change in the classroom through innovative media production and cover a range of different types of media, including video, digital storytelling, social media, art, music, and writing, with rich resources for instruction in every chapter. Through the engaging ideas and strategies, the contributors equip educators with the critical tools for supporting students' media production. In so doing, they offer new perspectives on how students can employ media and production techniques to critique the status quo, call for change, and acquire new literacy skills. As the effects of the climate crisis become increasingly visible to the youth population, this book helps foster and support youth agency and activism. *Youth Media Creation on the Climate Change Crisis: Hear Our Voices* is a necessary text for students, preservice teachers, and educators in literacy education, media studies, social and environmental studies, and STEM education. The eBook version of the text features embedded audio and video components, as well as interactive links, to reflect the multimodal nature of students' work, spotlighting how youth media production supports the development of students' critical literacy skills and shapes their voices and identities.
