Precision Health in the Digital Age: Harnessing AI for Personalized Care Papadopoulou, Paraskevi, Lytras, Miltiadis, Konstantinopoulou, Sofia, 2024-12-06 The evolving healthcare landscape is now challenging healthcare providers and researchers to deliver personalized care considering individual genetic lifestyle and environmental factors To tailor treatments and interventions to each patient's unique profile in a timely manner they need to harness the vast amounts of readily available data Artificial intelligence AI has immense potential to revolutionize precision

health by enabling the analysis of large datasets and generating actionable insights for personalized care. However, implementing AI in healthcare comes with challenges including ethical considerations, regulatory frameworks, and the need for healthcare professionals to develop competencies in AI technologies.

Precision Health in the Digital Age: Harnessing AI for Personalized Care offers a comprehensive solution for healthcare professionals, researchers, and policymakers seeking to leverage AI in precision health. The book explores the latest advancements in AI technologies, showcases their applications in precision medicine, and provides a roadmap for integrating AI into healthcare systems. It offers practical insights for improving patient outcomes through case studies and real-world examples of successful implementations of AI-driven precision medicine and health solutions.

Home Care for Older Adults Using Interprofessional Teams Danita H. Stapleton, Sekeria Bossie, 2023-10-16. This textbook fosters a deeper understanding of how home healthcare goals for older adults can be achieved through interprofessional collaboration. The contributors create a context where allied health and healthcare professionals can acquire and exchange knowledge about their diverse disciplines and practices for the betterment of the home care population. The book also reinforces what the COVID-19 pandemic made quite apparent to health institutions and providers: patients can receive adequate and acceptable care within the home setting. The pandemic also highlighted the important role that interprofessionalism can play in attaining desired patient outcomes. Statistics reveal that the population of persons over the age of 65 years is the largest that it has ever been. This volume focuses on older adult patients because caring for these individuals from an interprofessional perspective is now more important than ever. Through the ten chapters of this edited book, the contributors, including home care providers, offer their perspectives on interprofessional collaboration and the provision of quality home care services. They use the Interprofessional Education Collaborative's IPEC four core competencies as a framework for improving the collaborative practice of home health care for older adult patients with complex medical issues. Among the topics covered: Medical Social Work and Case Management, Skilled Nursing, Physical Therapy, Occupational Therapy, Behavioral Health Care, Other Relevant Home Care Services, Prosthetics and Orthotics, Pharmacy Services, Durable Medical Equipment and Nutritional Services. **Home Care for Older Adults Using Interprofessional Teams** is intended for advanced undergraduate and graduate students in health or allied health programs and can be used as a primary text for interprofessional education courses. The text benefits students, instructors, and faculty who have stakes in obtaining positive health outcomes for older adult patients. Today, more and more programs are requiring the development of interprofessional competencies. This book provides a forum where students can obtain in-depth knowledge of teaming as well as the roles and functions of various care providers.
